Pastry Flour, Low Grade Flour, Bran and Shorts
 made by the above named millers and at close prices.

NOTICE TO FARMERS.

Having bought the Chopping Mill from Stewart & Co., the price of Chopping will be raised from five to six cents per cwt., commencing the 10th day of Oct. Thanking you for your liberal patronage, we hope for a continuance of the same with good work and honest dealings. Flour exchanged for wheat or course grain.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. 25 cents.

RAILWAY SIGNALS

"Fireworks" That Serve as Train Protectors.

CODE OF TORPEDO AND FUSEE

Messages These Audible and Visible Danger Signs Convey to the Engineer—The Use of Pyrotechnics as Signals in the Naval Service.

"Pop, pop," or perhaps a single "pop," sharp and distinct like that of a giant firecracker heard not only on the Fourth of July, but on every day in the year, Sundays included. What did it mean? And on almost any night as I look out of my window I see the edge of the wood or the fields lighted up by red or yellow fireworks. Why this strange illumination?

As all these queer happenings took place on the railroad a few rods from my house I made inquiries of the railway officials, and here are some interesting facts about the use of these curious "fireworks."
 The general superintendent of the New York, New Haven and Hartford railroad explained as follows:
 "Our rules provide for the use of detonators, commonly known as torpedoes, as audible signals and of 'fuses' as visible signals."

"These torpedoes are attached to the top of the rail on the engineer's side of the track by two small flexible metal straps, which are easily bent around the ball of the rail, as shown in the picture, and hold the torpedoes securely in place until exploded by the first train passing over this track.

"The explosion of one torpedo is a signal to stop; the explosion of two, not more than 200 feet apart is a signal to proceed with caution."

MAKE THIS TEST

How to Tell if Your Hair is Diseased.
 Even if you have a luxuriant head of hair, you may want to know whether it is in a healthy condition or not. 98% of the people need a hair tonic.

Put a hair out of your head, if the bulb at the end of the root is white and shrunken, it proves that the hair is diseased, and requires prompt treatment if its loss would be avoided. If the bulb is pink and full, the hair is healthy.

We want everyone whose hair requires treatment to try Rexall "93" Hair Tonic. We promise that it shall not cost anything if it does not give satisfactory results. It is designed to overcome dandruff, relieve scalp irritation, to stimulate the hair roots, tighten the hair already in the head, grow hair and cure baldness.

It is because of what Rexall "93" Hair Tonic has done and our sincere faith in its goodness that we want you to try it at our risk. Two sizes, 50c. and \$1.00. Sold only at our store—The Rexall Store.
 J. W. McLAREN, WATFORD.

mal to reduce speed and look out for a stop signal.

"The fuses are of similar construction to the well known Roman candle used for fireworks celebrations, except that they burn a steady flame without explosions. A sharp iron spike at the bottom end will usually stick in the ground or in the cross tie when thrown from the rear of a train and holds the fuses in an upright position, where it is more plainly visible.

"A fusee must be lighted and left by the flagman whenever a train is running on the 'time' of another train or behind its own time and under circumstances which call for such protection.

"A fusee on or near the track, burning red, must not be passed. When burning yellow the train may proceed with caution when the way is seen and known to be clear. Standard fuses burn red for three minutes and yellow for seven minutes and can be seen for quite a distance.

"You will gather from the above explanations that the red glare of a flaming fusee on or near the track warns the approaching engineer that a preceding train has passed over his track less than three minutes ahead of him, and under no circumstances must he pass this signal while burning red. When the flame turns to yellow he may proceed with caution, only as the way is seen and known to be clear, keeping in mind that when the fusee changed from red to yellow he was exactly three minutes behind a preceding train, which may have stopped within a short distance or may be proceeding at an unusually slow rate of speed."

The superintendent of the Shore line division, another branch of the same railroad, gives this additional detail regarding torpedoes:

"When a train stops upon the main line and requires protection against a following train the flagman goes back a specified distance and places one torpedo. He then continues a farther distance back, placing two torpedoes. As soon as the train he is protecting is ready to start the engineer blows a specified whistle signal, which is a notice to the flagman to return to his train. On the way back he picks up the one torpedo, leaving two on the rail to warn the engineer of an approaching train that another train is a short distance ahead and to give the flagman time to run back and get aboard of his own train."

Of the use of fireworks as signals in the navy the chief of the bureau of construction and repair of the navy department, Washington, makes the following statement:

"All modern ships are fitted with electric signals, and the use of such signals is general in the naval service. In the case of small vessels having no electric installation and also for use in case of the failure of the electric signals the navy has a system of colored stars in connection with rockets for the purpose of signaling.

"These are in no sense the ordinary commercial fireworks, but are manufactured by the service for naval use exclusively.

"There are no photographs of this system of signals for distribution. The apparatus consists of a specially designed pistol from which are fired cartridges containing the colored stars that are used in the service code."
 —New York Mail.

Mighty Arcturus.
 Arcturus is one of the most brilliant stars that we can see in the heavens. Its diameter is 62,000,000 miles. The light that comes to us from it is over 200 years old when it enters our eyes. The sun is distant 93,000,000 miles. Then compare eleven minutes with 200 years.

Truth is as impossible to be soiled by any outward touch as the sunbeam.
 —Milton.

NATURE STOPS When the Kidneys Give Out.

Do you feel that you simply can't go any farther—that you must have rest for that lame and aching back—relief from that constant dead-tired feeling—freedom from those stabbing, darting pains? It is nature's warning that the kidneys are giving out and you need the help of Booth's Kidney Pills, the guaranteed kidney remedy. In every machine there is one part that works the hardest and gives out first. The kidneys work night and day, and naturally a life of unusual activity doubles the duties of the kidneys and in time the strain tells. The kidneys give out and nature cries "stop." Booth's Kidney Pills are sold by all dealers, 50c., postpaid from The R. T. Booth Co., Ltd., Fort Erie, Ont. There is no pill just as good. Send for a Free box. The test will prove the truth of our statement.

Once in a great while you meet a woman who is given to retailing gossip—but the majority are wholesale distributors.

Doctors Condemn Oily Liniments

The Public are Warned to Be Careful of These Strong-Smelling Oily Liniments Containing Harmful Acids, Ammonia, Etc.

Many people have clung to the old-fashioned idea that a thick, greasy liniment is the best kind. Doctors say not—and they know.

Recently a number of these white, oily liniments were analyzed, and they were found to contain an enormously high percentage of harmful acids, and such irritating chemicals as ammonia, etc. For the moment they may cause a warm sensation when first applied, but their continued use never cures rheumatism, and only deteriorates the skin, sets up inflammation and causes endless trouble.

When a doctor warns you to quit using a white, oily liniment—do so. He knows that a thick liniment can't penetrate, can't sink through the pores and reach the seat of the pain.

When asked his opinion a few days ago, Dr. Roberts stated that he considered a strong, penetrating, pain-subduing liniment such as "Nerviline," to be superior to any of the white, ammonia liniments. In his twenty-five years of practice he had witnessed cases of rheumatism, sciatica, and lumbago that simply would not respond to ordinary treatment—but "Nerviline" cured them. The same physician also spoke of the great advantages of keeping a preparation like "Nerviline" in the house always, because of cramps, diarrhoea, stomach disorders, earache, toothache, headache, and such minor ailments. "Nerviline" is a first-class cure. There is scarcely an ache or a pain, internal or external, that "Nerviline" won't cure. In thousands of homes no other pain-relieving medicine is used. Fifty years' continued success and the endorsement of the profession are proof that "Nerviline" is the liniment for the home.

CORNS CURED IN 24 HOURS

You can painlessly remove any corn, either hard, soft or bleeding, by applying Putnam's Corn Extractor. It never burns, leaves no scar, contains no acids; is harmless, because composed only of healing gums and balsams. Fifty years in use. Cure guaranteed. Sold by all druggists, 25c bottles. Refuse substitutes.

Concrete Sidewalks are Safe, Sightly and Everlasting

LUMBER used in damp places and on wet ground—as, for instance, in walks—has a very short life. It requires almost constant repairing and, in a few years, needs replacing.

Concrete, on the other hand, improves with age, and the very dampness which destroys lumber calls out the best qualities of the cement by making it harder and harder—until neither time nor traffic can affect it.

The best of wooden walks keep getting out of repair, and are a continual menace to life and limb. They are also a frequent source of expensive doctor bills and lost time. Then again, they are likely to eat up the original cost

in repairs before they are replaced. Concrete walks are sightly, everlasting and safe. They cost less to build and need no repainting nor painting.

Write for our free book, "What the Farmer Can Do With Concrete."

It tells in plain, simple language, how you can save money on farm construction by using cement for Barns, Dairies, Foundations, Fence Posts, Troughs, Feeding Floors, Hitching Posts, Stalls, Silos, Stairs, and so forth. The book is well illustrated with photographs, plans and diagrams. Fill out the coupon or send a postal to-day.

Simply address it to Canada Cement Co. Limited, 51-60 National Bank Building, Montreal.
