**Design and Construction—**  
The Model Coal-Burning  
Brooder is simple in con-  
struction and easy to op-  
erate. It is built to do the  
work of brooding with the  
least possible attention and  
at low operating cost. There  
is nothing to get out of order  
and with reasonable care will  
give many years of satis-  
factory service.

**The Stove, of special design,**  
is made of grey-iron. Each  
casting is of sufficient size  
and weight to elimi-  
nate breakage and in-  
sure long wear.  
**Automatic Regulation—**The tempera-  
ture below the cano-  
py always remains  
uniform as long as  
fuel is supplied. The thermostatic control governs the heat in all  
kinds of weather. The only adjustment of the regulator is made at  
the beginning of the season and needs no change, regardless of out-  
side weather conditions. "Models" efficient control of temperature  
insures great economy in fuel consumption. Filled once in the  
morning and once at night, all worry and trouble is over.

Satisfaction or full money refunded. We carry everything in the  
poultry supply line. Established over 35 years.

Incubators, egg capacity from 50 to 800, from \$8.00 and upward  
Brooders \$6.00 and upwards. Day-Old-Chick Boxes, 25, 50 and  
100 chick size, \$1.50, \$2.00, \$3.00 per doz., including fasteners..
