

"The Dervise in the Eastern Fable claimed to have discovered the language of birds, while to the vulgar their notes were mere inarticulate sounds, without passion and without meaning. The Entomologist does not, indeed, pretend to understand the language of insects, for they all breathe through spiracles or branchiae, their mouths are everlastingly dumb. But from signs and tokens well-known to him, he can interpret their actions, and recognize at a glance what object they are pursuing, whether sport, or love, or war, or food for themselves, or food for their future progeny, or the construction of habitations, either for themselves or for that future progeny, which they are doomed never to behold. Under every stone, under every clod, and even under the most despised substances, there is a little world in miniature opened to his eyes. And there scarcely grows a plant but what contains, in Nature's own hieroglyphs, a whole volume of natural history written by the finger of the Great Author of our being." - *B. Walsh.*

J. H. THOMAS'

Moveable Comb or Frame Hives

ARE all that can be desired for a bee-hive. They
were awarded the first prize at all the Provincial
Fairs for seven years. They possess more advantages
than any other hive in the market, yet are more simple
in construction and easier to operate with, which we are
prepared to demonstrate at any time. In fact, they are
the best and cheapest frame hive now before the public.

SAWING-MACHINE THE CHEAPEST THE BEST

HAMILTON, ONT.

Office of the Appleton
Knitting Machine Company.

Hamilton, June 1, 1872

THE APPLETON
KNITTING MACHINE CO'Y,

ARE now prepared to exhibit their invention to the
public.

They claim for it a superiority over every other
Knitting Machine.

It is perfect in its action, working smoothly and ac-
curately, and will not get out of order.

It will knit close or open, plain or ribbed work.
Knits in any shape, with single, double or triple thread,

WITH A PERFECT SELVAGE.

It will make a long, or short stitch, without stopping,
and will knit backwards and forwards without tension
on the yarn; in short, it has none of the defects of the
other machines, and is an improvement on them all.

The standard of excellence of all knitted goods is
that made by hand, therefore, it is required of a first-
class Knitting Machine, that it produces Stockings, Socks,
Shirts, Drawers, Mitts, Scarfs, and all other knitted
goods, as perfect as the hand made article.

The Machine is constructed in the most substantial
manner, finished in first class style, and will last for
years. It does perfect work; simple in construction;
there is nothing about the machine but what may be
understood at sight, and the most inexperienced may in
a few hours acquire a knowledge of working it.

The Appleton Knitting Machine Company are pre-
pared to submit their invention to any test or comparison
with any other, and they desire no higher recommen-
dation than that they feel assured will be accorded it
by the Public.

A Book of Instruction is provided.
