

22. *Fiber osoyosensis*. Pacific Muskrat.
Common.
23. *Zapus trionotus*. Western Jumping Mouse.
Found in suitable localities from sea level to 7,000 feet. Most abundant on the mountain tops.
24. *Erithizon epixanthus*. Western Porcupine.
Very scarce.
25. *Lagomys minimus*. Least Pika.
Mr. Bangs has re-instated Lord's species from specimens I sent him taken near the type locality. Found in nearly all rock-slides from 100 feet to summits of highest peaks.
26. *Lepus washingtoni*. Washington Hare.
Common in the bottom lands.
27. *Lepus columbiensis*. Columbian Varying Hare.
This is one of the only mammals that are found in this locality I have never succeeded in taking specimens of. The hares north of the Fraser and in the mountains all turn white.
28. *Felis oregonensis*. Pacific Cougar.
Not uncommon and very destructive to both game and stock. In some localities they have about exterminated the deer. I have then noticed the bones and teeth of *Aplodontia* in their dung. The young ones are handsomely spotted, differing in this respect from the form found east of the Cascades.
29. *Lynx canadensis*. Canada Lynx.
Now very scarce, used to be not uncommon.
30. *Lynx fasciatus*. Coast Wildcat.
Not uncommon, used to be abundant.
31. *Canis occidentalis*. Wolf.
Very scarce, both the black and gray forms occur.
32. *Canis latrans*. Coyote.
Coyotes of late years have made their appearance in the Chilliwack Valley.
33. *Vulpes vulpes*. Red Fox.
I have heard one or two reports of foxes, and saw the remains of a red one that was killed at Pitt meadows.
34. *Ursus horribilis*. Grizzly Bear.
Found in the mountains only. I saw one shot near Summit Lake, of an almost uniform drab gray, almost white.
35. *Ursus americanus*. Black Bear.
Once abundant but getting scarcer—still does great damage to raisers of hogs. Both black and "cinnamon" forms occur and intergrade.
