## Miscellaneous.

### REPORT OF THE NEW YORK PASTEUR INSTITUTE.

Dr. Paul Gibier, director of the New York Pasteur Institute, begs to inform you of the results of the preventive inoculations against hydrophobia performed at this institute since its opening (February 18th, 1890).

To date 610 persons, having been bitten by dogs or cats, came to be treated. These patients may be divided in two categories:

1st. For 480 of these persons, it was demonstrated that the animals which attacked them were not mad. Consequently the patients were

sent back after having had their wounds attended, during the proper length of time, when it was necessary. Four hundred patients of this series were consulted or treated gratis.

2nd. In 130 cases the anti-hydrophobic treatment was applied, hydrophobia having been demonstrated by veterinary examination of the animals which inflicted bites or by the inoculation in the laboratory, and in many cases by the death of some other persons or animals bitten by the same dogs. All these persons are, to-day, enjoying good health. In eighty cases the patients received the treatment free of charge.

The persons treated were: 64 from New York, 12 from New Jersey, 12 from Massachusetts, 8 from Connecticut, 9 from Illinois, 3 from Missouri, 3 from North Carolina, 3 from Pennsylvania, 2 from New Hampshire, 2 from Georgia, 2 from Texas; 1 each from Maryland, Maine, Kentucky, Ohio, Arizona, Iowa, Nebraska, Arkansas, Louisiana, and Ontario, Can.

With kindest regards of the Pasteur Institute,  
PAUL GIBIER.

New York, Oct. 15th, 1890.

## Chicago Polyclinic.

THE SECOND SPECIAL

*Course for Practitioners*

—ON—

### ABDOMINAL AND PELVIC SURGERY,

—WITH—
