

A SIMPLE WAY of Washing Clothes.

The peculiar properties of SURPRISE SOAP make it unnecessary to boil or scald a single piece.

The tea kettle will hold all the hot water required for an ordinary wash; the heavy wash boiler is not needed; the hot steam is not about the house on wash day.

'Tis very simple, and it gives the cleanest, sweetest, clothes, and the whitest.

It greatly lessens
the labor of wash-day.

READ

the directions
on the wrapper.

There's none of that free alkali in SURPRISE which hurts the hands and rots the clothes.

It's easy enough to test SURPRISE. If you don't like it the first time—but you will—don't get it again. Four cakes for twenty-five cents. At any Grocer's.
