Products/Services

AIR POLLUTION CONTROL
RECYCLING
RESOURCE MANAGEMENT
SITE RECLAMATION
WATER & WASTEWATER

Acid Mine Drainage Services
Analytical Services
Audits/Assessments
Consulting Services: Acid Rock Drainage

Energy Planning
Engineering
Management

Engineering & Construction
Flotation Systems
Heat Exchangers/Energy Recovery
Independent Inspection
Information Management Systems
Infrastructure Design
Inspection, Materials
Laboratories, Testing/Mobile And Fixed

Mine Waste
Multi-Disciplinary Services
Package Treatment Systems
Pilot Plants For Process Research
Plating Waste Treatment
Pollution Abatement Services
Project Management Services
Remediation Services
Research Services
Silver Recovery Systems
Site Inspection
Sludge Handling/Treatment
Soil Treatment/Reclamation
Wastewater Treatment Services
Water Pollution Control

Company/Product

Cominco Engineering Services Ltd. (CESL) is an independent consulting engineering firm and specialty equipment supplier. CESL originated over 75 years ago as the technical and project arm of Cominco Ltd., an international natural resources organization.

The basis of CESL's environmental services and products is the company's involvement in the forefront of technological advancement in the base metals industry. CESL's approach to the environmental field is based on a strong metallurgical processing background, which results in practical solutions to industrial pollution problems, with specific reference to metals such as lead, zinc, mercury, cadmium, arsenic, chromium, and iron.

The Environmental Division of CESL have permitting, process development, and engineering skills developed specifically to meet the requirements of the expanding environmental sector. In particular, CESL's expertise includes water and wastewater treatment, heavy metal removal, soil remediation, sludge reduction and handling, air emission improvements, and remediation management.

Services and products offered include consulting, laboratories (analytical), flotation systems (column flotation), and heat exchangers (bulk flow heat exchangers).

Contact Sought

Industries that could benefit from CESL's technology and experience include iron and steel, metal plating and galvanizing, battery production, and recycling of lead, paint production, tanneries, and various industrial chemical facilities.

CESL has full access to the diversity of expertise available within the Cominco organization and can readily find appropriate personnel with operating and related technical expertise to meet client needs. CESL would also entertain licensing arrangements with overseas companies seeking to broaden their product line (i.e. with environmental and column cell technology).
