Winnipeg from native

urnished to the Govern-  
stances as high as from  
ht per bushel of about

per acre averages from  
lbs, per bushel. This  
o far as known the yield

e early days of the Red  
the old settlers, but at  
eans to manufacture the  
ction then.

ne attention to the pro-  
evidence of those who have  
aracter. There is not  
th-West peculiarly fav-  
both flax and hemp, they  
ces of the country. A  
eration in Winnipeg.

pted to the growth of  
ity is well known to be  
gh as  $4\frac{3}{4}$  pounds each,  
eally to the very core.  
is country tend to make

the potato a profitable crop even during the  
after breaking, by turning the sod over on

The average yield per acre as stated b  
ranged from 300 to 320 bushels, and a nu  
of 400 bushels of potatoes per acre. The  
has been from 55 to 60 lbs.

The following statements have been mad  
actual experiences in Manitoba, and the No

W. H. J. Swain, of Morris,

Has produced 800 to 1000 bushels of  
bushels of beans have also been raise

S. C. Higginson, of Oakland.

Has produced cabbages weighing  $17\frac{1}{2}$

Allan Bell, of Portage-La-Prairie,

Has had cabbages 45 inches around  
pounds each.

### Beets.

A good deal of attention is already being  
Canada to the cultivation of the sugar-bee  
sugar, but there is no part of the Dominion  
such paying quantities as in the North-We  
with which they can be cultivated, all tend  
beet crops profitable, more especially when  
beet, large quantities can be used for manu

### Fruit Culture

As yet the culture of fruit and apples in  
fancy, but there is no doubt that certain va  
fully. An abundance, however, of wild  
berries, raspberries, whortleberries, cranbe  
currants, blueberries and grapes, so that th  
spect for the settler, and he will find the fla  
North-West most delicious. In Minnesot  
was contended that apple trees would not  
the Minnesota apple is a notable product o

### Labor.

There is a considerable demand for farm  
part of the growing season, when good w  
being about \$20 per month with board.

In this way settlers, whose means are li  
tide over the first season or two, by worki  
neighbors, until such time as the increased  
requires all their attention.

### "The most successful thi

The following statements made by actual  
the authority of the Government, are th  
proofs of the great advantages offered by M  
West, as a most desirable field for immig

"I am a native of Western Ontario an  
years. This is my fifth year here, and I  
anywhere else.

"JAMES ST

"I would just say that there are no obn  
field is ready to be reaped, as a rule you c  
Flax grows well in this country. I think  
I have seen it grow as tall as I saw it in I

"Vegetables of all kinds grow splendid  
with no manure.

"MATHEW OW

"I have been in the country six years  
summer to give the best crops, even thou
