Threshing Shows Good Crop Yield.

Calgary, Sept. 2.—Rainfall in Calgary district during the month of August amounted to 3.97 inches. Dry farmers claim that they can raise the best possible crop with 5 inches of rain fall during the season, so present amount of moisture should serve them favorably. Rainfall during the month of August, 1909 amounted to .59 and crops last year were excellent. Alberta Pacific Elevator companies say that the threshing report while not yet complete show a crop far beyond expectations.
