

The New Fairbanks-Morse Forest Fire Pump

delivers a greater volume of water---during recent tests it delivered 55 U.S.G.P.M. It has drop forged connecting rods and crank shaft, a smaller fly-wheel which lowers the centre of gravity and eliminates the tendency to tilt when being transported. It has a rope starter, rigidly installed fuel tank. etc., etc.

It is believed that this new model is the most efficient and satisfactory fire pump that has yet been placed on the market.
