Geo. G. Gould, R. No. 4, Essex, Ontario

Ontario Beekeepers' Association Convention 1915.

The annual convention of the Ontario Beekeepers' Association will be held in the York County Council Chambers, 75 Adelaide St. East, Toronto, on Tuesday, Wednesday and Thursday, Nov. 23, 24 and 25. The Executive have drafted a very attractive program that is sure to prove interesting and instructive. The principal outside speaker will be Dr. E. F. Phillips, in charge of Bee Culture Investigations, U. S. Department of Agriculture, Washington, D. C. Dr. Phillips has been investigating wintering conditions of the colony, and at the opening session, Tuesday afternoon, will speak on "Temperature and Humidity in the Hive in Winter." In the evening he will give an illustrated lecture—"Some Bee-keepers of the United States." Being an extensive traveller and a keen observer, he is sure to have a valuable store of information for this occasion. On Wednesday morning, H. G. Sibbald, a large honey producer of Ontario, will deal with "Outdoor Wintering," and Morley Pettit, Provincial Apiarist, will give a summary of the year's work. The varying seasons of the past three years have introduced new features into bee management. Swarm control and summer protection have been practiced by F. W. Krouse, and he will relate his experiences. For the beginner, as well as the experienced beekeeper, a discussion on honey production, both comb and extracted, will be interesting. An exhibit of apiary appliances will be a special feature of the Convention. These handy tools and jigs are the inventions of practical beekeepers, and greatly assist both for speed and accuracy many of the small operations and manipulations about the apiary. Time will be allotted during the last session on Thursday afternoon for an address on "Modern Apiary Equipment and Buildings," by Wm. Elliott, Adelaide, Ontario. Prof. L. Caesar, of the Department of Entomology, O. A. College, Guelph, will discuss "Poison Sprays and Their Relation to Bees." Programs will be sent to members of the Association as soon as final arrangements have been completed. For further details address the Secretary-Treasurer, Morley Pettit, O. A. College, Guelph.

Gossip.

J. & D. J. Campbell, Woodville, Ont., write: "On account of illness we were not able to make our usual exhibit at Toronto and London, but a few things which we sold and which were exhibited at Toronto, gave a good account of themselves. We are still doing business at the old stand, and the goods we are offering should do the buyer some good. See our advertisement in this issue."

Few people realize the serious loss of life which results from trespassing on railroads. Almost 6,000 persons are killed, and about the same number injured in Canada and the United States each year while trespassing on the railroads, and more than 50 per cent. of those killed on railroads are trespassers. During six months ending June 30, 38 persons were killed and 34 injured on the Grand Trunk railway while trespassing. People should take notice of these figures and govern themselves accordingly, refraining from using railroads as public highways.

Robinson was one of those really good-natured souls who is always ready to lend a hand to a pal in distress.

One day, as he was peering along on his bicycle down a narrow country road, he came across a man holding a ram by the horns.

"Halloa!" cried Robinson. "Can I help?"

"I should be much obliged," replied the other, "if you'd hold this ram just while I get that gate over there open."

"Certainly," replied Robinson; and dismounting, he boldly seized the ram by the horns.

"Thanks, awfully," said the stranger, now on the other side of the gate. "The brute attacked me more than an hour ago, and I've been struggling with him ever since. So long, old chap. Hope you'll be as lucky as I was."—Philadelphia Ledger.

Fill Your Silo**Quicker with Less Power**

We make all sizes of hand and power Feed Cutters for every kind of work. Our line embodies the latest improvements for lessening the danger and inconvenience met with in many machines of this class. Inspect the line of

Peter Hamilton Feed Cutters and Silo Fillers

Our No. 7 Tornado Ensilage Cutter and Blower (illustrated) will handle 8 to 10 tons of corn per hour easily.

FRAME of selected Canadian hard maple, mortised and tenoned, always tight and rigid. FAN CASE is cast iron—stands friction and wear better than steel. FANS are hot-ripped in place, never get loose. KNIVES are high-graded steel, and adjustable for cutting all kinds of fodder. TOP ROLLER is self-conforming to uneven feeding.

Many other features will meet with your approval. Write to-day for booklet describing both hand and power outfits in full.
