

Complete-ness

YOUR tractor should be a *complete* power investment. It should be one that can be used practically every day of the year, one that is 100% efficient, belt and drawbar.

The **International 8-16 kerosene tractor** meets those requirements. The drawbar has a wide range of adjustment both up and down and sidewise so that the tractor will pull any machine or implement on the farm with equal advantage.

The 8-16 pulley permits backing the tractor into the belt easily and quickly—so placed also that the belt doesn't rub against any part of the tractor nor drag on the ground. And 8-16 power is just right—neither too heavy nor too light—it *fits* practically

any drawbar or belt power task on the average farm.

Aside from its adaptability for all-year-round farm work, the **International 8-16 tractor** is a 100-cents-on-the-dollar investment because of its exceptionally efficient and economical (kerosene) operation; because, too, you can always secure repair and expert service without delay through the branch houses and many agents scattered over Canada. Your International agent—wherever he is—has a Harvester branch in easy reach.

If you are interested in a *complete* tractor power investment just write your name and address along the margin of this advertisement and mail to the nearest address so that we can send you full descriptive information of the **International 8-16**.
