

DE LAVAL CREAM SEPARATORS

The Best and Most Profitable of All Summer Farm Investments

A DE LAVAL Cream Separator is the best and most profitable of all farm investments at any time—and even more so in summer than at any other time.

The waste of butter-fat without a cream separator is usually greatest during the summer months, and the quality of cream or butter produced without a separator the most inferior.

Moreover, the bulk of milk in most dairies is greatest at this season, so that the loss in quantity and quality of product counts greatest. It must count more than ever this year with the extremely high prices prevailing for cream and butter of good quality.

A DE LAVAL Cream Separator not only enables the production of more and better cream and butter than is possible by any gravity setting process but as well by any other separator.

Then there is the great saving of time and labor accomplished by the separator in the handling of the milk and cream, which counts far more in summer than at any other time, and alone makes the separator a profitable investment.

In this respect again the DE LAVAL excels all other separators by its greater capacity, easier running, greater simplicity, easier cleaning and greater sanitation.

All of these considerations are points which every DE LAVAL agent will be GLAD to DEMONSTRATE and PROVE to the satisfaction of any prospective buyer of a cream separator.

Why not look up the nearest DE LAVAL agent at once, and if you don't know him, write us directly, as below.
