The Dominion "Limited" is strictly within the better class of cars. Materials have been chosen for strength and long life, and the element of cheapness has not been allowed to enter into their choice. His aim in designing the Dominion "Limited" has been, strength, simplicity and economy of operation.

Dominion Limited

Read these details of construction. Take them to some friend who has a car and go over them with him. Make the most unsparring scrutiny; you will then understand why so many experienced motorists are recommending the Dominion "Limited" to their friends, and why the Dominion "Limited" is selling so rapidly that the first season's output will soon be exhausted.
The Motor: The four-cylinder motor, cast as a unit, is capable of producing 32 to 35 horse-power. This gives a road speed of more than 50 miles an hour, with full load of passengers, with plenty of reserve power for climbing hills. The size of cylinder 4 1-8 bore by 4 1-2 stroke. The valves are extra large, two inches in diameter, adjustable, with ample water jackets. They are enclosed with a dust-proof cover, which also deadens the clicking noise of the valve tappets.

The entire motor is simple, compact and well finished and runs almost as silent and smooth as an electric car.
Drive: Straight line shaft drive through nickel steel gears of ample strength.
Front Axle: Drop-forged, I-beam section, heat treated.
Wheels: Size 34 x 4. Extra large spokes of second-growth hickory.
