## The Evening Chit-Chat

By RUTH CAMERON

The cultivation of a good memory — everyone knows that's an advantage. The very suggestion of it is a bromide.

And yet I wonder if it is really any more a divine gift than something else that is seldom advised, the cultivation of the opposite quality — a good "forgettery."

Have you a good "forgettery?" Can you put out of your mind the silly parody on some solemn ceremony, the wicked suggestion of some sensual book, the muddy allusion of some libidinal rhyme, or must they always come back to you whenever something happens to call them to mind?

Nor are evil things the only ones for which we need a "good forgettery." It would also be good to be able to forget some of the useless and unimportant things that take up our brain room.

Conan Doyle makes his world famous hero, Sherlock Holmes, say that the reason he is able to remember so marvelously the many things important in his profession, is that he at once expels from his mind all information that is useless to him. For instance, he can instantly recognize aches from almost any brand of cigar, but the fact that the earth goes around the sun, instead of vice versa was not necessary to him and, therefore, he forgot it as soon as he had learned it.

I certainly do not think such complete ignorance of everything outside one's particular sphere very desirable, but I do think the ability to unload one's mind so completely of all unnecessary memories would be very fine to possess, and I wish Sherlock Holmes had explained just how he did it as glibly as he explains his others slight-of-mind feats.

Probably he did it by cramming his mind full of things he did want to remember.

I guess that's the only principle on which a good "forgettery" can be cultivated—the exclusion of the bad and useless by the free and full admission of the good and useful.

In an article on "Mental Chemistry" Orison Swett Marden, the new thought writer, says

"That man is truly great who can rule his mental kingdom, who at will can master his moods; who knows enough of mental chemistry to neutralize a fit of the blues, to antidote any evil, poisonous thought with the opposite thought just as a chemist neutralizes an acid which is eating into the flesh, by applying an alkaline antidote."

And then he makes the optimistic prophecy—

"The time will come when we shall find that it is just as easy to counteract an unfriendly, disagreeable, vicious thought by turning on the counter thought as it is to rob the hot water of its burning power by turning on the cold water faucet. We shall be able to regulate the temperature of our thought as the temperature of water. If the water is too hot we simply turn on the cold faucet. If we feel our brain heating up with hot temper we shall simply turn on the love thought, the peace thought, and the anger heat will be instantly counteracted."

In the same way I suppose an evil remembrance could be counteracted by a pleasant one.

I hope his prophecy is a true one.

Why not try to make it so?

Ruth Cameron

## The Fountain Head of Life Is The Stomach

A man who has a weak and impaired stomach and who does not properly digest his food will soon find that his blood has become weak and impoverished, and that his whole body is improperly and insufficiently nourished.

**DR. PIERCE'S GOLDEN MEDICAL DISCOVERY** makes the stomach strong, promotes the flow of digestive juices, restores the lost appetite, makes assimilation perfect, invigorates the liver and purifies and enriches the blood. It is the great blood-maker, flesh-builder and restorative nerve tonic. It makes men strong in body, active in mind and cool in judgement.

This "Discovery" is a pure, glyceric extract of American medicinal roots, absolutely free from alcohol and all injurious, habit-forming drugs. All its ingredients are printed on its wrappers. It has no relationship with secret nostrums. Its every ingredient is endorsed by the leaders in all the schools of medicine. Don't accept a secret nostrum as a substitute for this time-proven remedy of known composition. Ask your neighbors. They must know of many cures made by it during past 40 years, right in your own neighborhood. World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.

## HOUSEHOLD NOTES.

Paint wooden pails and tubs with glycerine to prevent shrinking.

Do not use salted water when boiling corn; the salt toughens the kernels.

To test linen or silk, wet a spot. If the moisture goes through, the linen or silk is pure.

To remove iron mold from marble tub marble with a cut lemon dipped in common salt.

When frying mush dip the slices first in the white of an egg. This makes them crisp.

Never try any brass or silver polish on lacquered ware. It will mean relacquering if you do.

Unless cake tins have been well greased, it is difficult to dislodge the contents when baked.

Manicure scissors will be found invaluable in cutting the bath-tubbed scapulas on a towel or other linen.

In order to avoid raising dust, sprinkle matting on hardwood floors with damp sawdust before sweeping.

The secret of keeping chambray skin and chemise gloves soft and supple is to hang it up to dry while still soapy.

When blackening the stove mix the black lead with turpentine. The pol-

ish will shine more brightly and last better.

When next making a chocolate custard or icing, add just a little ground cinnamon. The change in flavor is delicious.

When putting pudding desserts on a cake of ice, if a newspaper is first spread over the ice the dishes will not slip off.

To mend a torn umbrella stick black court plaster inside the tear. This will "show" less than a darn and will last for some time.

If a cup of coffee, with cream in it is spilled on the tablecloth rub the spot with pure glycerine and then rinse in tepid water.

Sifted coal ashes, wheat flour and sand mixed with water make an excellent mortar for patching holes where plaster is broken.

If the flavor of onions is unpleasant afterward—they are not digestible with every one—use soda mint or a pinch of salt on the tongue.

If lace is only slightly soiled and one wishes to clean it and at the same time give it a little body, try sponging it off with alcohol.

When a tablecloth begins to show signs of wear along the middle, make

## Ayer's Sarsaparilla

## RETURNED TO WORK IN A WEEK

Mr. P. M. Shannon Cured of Catarrh by one Single Treatment of "Father Morrissey's No. 26."

Dalhousie, N.B., Nov. 23, 1908.

FATHER MORRISSEY MEDICINE CO., LTD.

For three years I had suffered from Catarrh in the head until March, 1903, when I had to leave my work, then in single months, after trying 4 different catarrh cures, and two doctors who claimed there was no cure. One single treatment of Father Morrissey's prescription cured me and I returned to work in a week after starting to take the treatment, and have never had so much as a cold in the head since.

P. M. SHANNON.

We have plenty of letters like this proving positively that "Father Morrissey's No. 26" Combined Treatment has cured hundreds of cases of Catarrh, generally after other treatments had failed. Why shouldn't it cure you? In justice to yourself give it a trial. Combined Treatment (Tablets and Salve) 50c. At your dealer's, or from Father Morrissey Medicine Co., Ltd., Chatham, N.B. 21

## The Roosevelt Boom.

Special Evening Telegram.

FARGO, N. D., Sept. 5.

The man who fought his way to ex-President Roosevelt and called him a liar, gave a bad scare to-day at Island Park in this city. Col. Roosevelt seized the man and helped to eject him from the platform. The Colonel had just finished his Labor Day address which he had delivered to one of the largest crowds which had gathered to see him on his western trip. A heavy rainstorm which came up shortly before the Colonel began to speak, drenched the people, but most of them sat through the afternoon in their wet clothes to hear him. A platform seating a thousand persons had been built at the bottom of a natural amphitheatre in the park and in the middle of it was the speakers stand on which Col. Roosevelt was speaking.

## Cricketers Hold Second Meeting.

Last night in the offices of Messrs. Bowring Bros. the committee appointed at the initial meeting of the Cricket Association to look into the matter of obtaining suitable grounds for matches met. Mr. J. S. Munn occupied the chair and there were present many members including Messrs. F. Myler, B. Job, P. Wallace, P. Berrigan, Hon. John Harvey, H. V. Simms, Councillor C. W. Ryan, J. Savage and John Donnelly. Mr. Jas. Foley was appointed Secretary in the absence of Mr. C. EMHs.

The first matter reported on was in reference to the securing of the Parade Ground. To make it suitable for cricket would entail an expenditure of at least \$2,000, while to put the ground in extra good condition would cost fully \$5,000. This would include the cost of fencing, leveling, etc. The T. A. people hold a portion of the place which they acquired for cricket purposes, and they will be asked if they would waive their option on this part of the ground and come in with the Association to further the interests of the game. It was not decided what would be done in connection with this matter.

The committee appointed to enquire into the possibility of acquiring St. George's Field also reported. The field is held by the Football League whose lease has yet to run 8 years. The League it was thought would give the cricketers the use of the ground on terms to be later arranged, but it is not likely that the St. George's Stock Co. will give the field to any other organization after the Football League term expires. Should the T. A. people give a favourable reply to the Association's invitation to identify themselves with the new movement, a committee was appointed to wait on the Premier and ascertain from him on what terms the Parade Ground could be acquired and for how long. This committee is comprised of Hon. John Harvey, Messrs. R. B. Job, Councillor Ryan, P. Wallace, P. J. Berrigan, R. Goodridge, H. V. Simms, P. J. Myler, J. Blackwood, J. S. Currie, the Chairman and Secretary.

Messrs. J. S. Currie and W. H. Peters were added to the General Committee. An adjournment was then taken till 9.15 on Monday night next.

a hem down one side, to change the place of the middle crease.

A few drops of kerosene sprinkled over the garbage can each day will prove helpful in keeping the can free from unpleasant odors.

Green vegetables of any kind will be found more tasty if they are taken out of the water, with a collander, while the water's still boils.

Peach pits are said to be an excellent remedy for dyspepsia, the prescription being two or three pits chewed fine and eaten after each meal.

If an egg is cracked it may be boiled without fear of the shell's contents being lost. First wet the crack and then sprinkle salt over it.

Get rid of mice by putting branches of peppermint or the essence around here the mice have been. Repeat the process every two or three months.

When frying the stove is often splashed over with grease. To prevent this sprinkle a little salt in the frying pan before putting in the fat.

To remove grease from carpets make a paste of Fuller's earth and ammonia. Spread over the marks and leave till dry. Then sweep in the ordinary way.

Always shrink a new braid before sewing to a skirt, otherwise the bottom of the skirt will become puckered the first time of wearing in a shower of rain.

If sour milk has become very thick cut it into a bowl and beat until light with an egg beater. It will then be smooth and much better for baking purposes.

Very restful at the end of a journey on a hard day's work is a bath in which a little camphor is dropped. Lavender and cologne added to a bath also are refreshing.

Many women know the value of borax in removing stains of any kind from the fingers. It is equally helpful in removing stains from white fabrics.

QUALITY is our SLOGAN

but

Our Prices are Reasonable

THESE GOODS, ALL EDENS' QUALITY, speak for themselves.

### BULLDOG TEA

Acknowledged by people who know to be the best at the price—

per lb. . . . . 40c.

## Fishery News.

Harbor Grace—Plenty squid; boats 1/2 to 2 qts.

Bonne Bay—Squid fairly plentiful here; from 4 to 10 qts. codfish per skiff taken on Saturday.

Sound Island—Boats 3/4 to 1/2 qt. in nets; plenty squid.

Carbonear—Better; traps 1/2 to 2 qts.; trawls 1/2 to 3/4 qt.; bait plenty.

Catalina—Boats that got bait did well, 2 to 3 qts., only a few, and most away looking for bait. Three schooners arrived from French Shore—One, 200 qts.; others, 120 qts. each.

Nipper's He.—Boats from 1/2 to 1 qt.; some squid.

Lark Hr.—Good fishing Saturday with hand line.

Tilt Cove—Very little done last week; yesterday boats from 1/2 to 1 qt.; plenty squid.

Trinity—The following schooners arrived from Labrador this morning: Gertrude K., 100 qts.; Raymond Howard, 300; Vigilant, 200; Clarina, 300; Petunia, load; Annie B., 400; Dulcie Bell, 250; A. R. C., 30; Egeal, 200.

Bay de Verde—Boats 1 to 3 qts. yesterday; plenty squid.

Lark Hr.—Fair fishery; plenty squid for hand lines.

## McMurdo's Store News

TUESDAY, Sept. 6, '10.

Diexo, the sanitary disinfecting cabinet, is ready for use at any moment. All you have to do is to hang it up. It will destroy all unpleasant odors and keep its strength for years. It is a form of insurance against disease, and every house should have one or more. Price \$1.00.

The Diexo Phone Disinfecter is for a similar purpose, but is of course designed for the mouthpieces of telephones. It is fully guaranteed for one year. Price 50c.

Do not fail to send along your tree order at once. Our list is open for a few days only.—adv.

## S. S. Taff in Port.

The s.s. Taff, Capt. Savage, arrived here from Cardiff at 9.30 last night with 1,000 tons of coal consigned to A. J. Harvey & Co., which she is discharging at their premises. The ship had splendid weather on the run out and after discharging will load fish for Europe at A. J. Harvey's premises. Both Capt. Savage and his ship are well known here, having on several occasions taken fish cargoes from this port to Europe. For a while this season she was running in the fruit trade between the United States and West Indian ports.

Special to the Evening Telegram.

### CAPE RACE, To-Day.

Wind light and variable. The S. S. Taff passed in yesterday afternoon; nothing in sight to-day. Bar, 29.60; ther. 60.

## Whitewashing the Coal

Readers who have been laying in their supply of coal for the winter months may have noticed that many of the lumps were coated with whitewash, and they doubtless wondered what was the reason for the unique decoration. Although the white coating may be considered to have improved the appearance of the ordinary black coal, that was not the object in view.

For many years the railway companies have been annoyed by coal thieves, and thousands of tons of fuel were stolen annually. As the great cart-lads, containing forty tons each, are being carried from the coal mines it is very easy for unscrupulous persons to remove a ton or two from a wagon, without causing any noticeable change in the appearance of the load. Only when the wagon is again put on the scales is the loss detected, and then it is too late to trace the guilty parties.

To check these depredations the railway men have adopted the whitewash method of safeguarding their freight. After a truck has been loaded a solution of lime and water is sprayed over the coal, and when the water has evaporated a white coating of lime remains on the top layer of lumps. Then, if any of the coal is removed, a black patch will be left upon the white surface to attract the attention of inspectors and station-masters before the train has gone many miles from the scene of the theft, and thus the offender is easily traced.—The Bits.

THE FIFE'S RUN.—The yacht Fife, with Mr. W. D. Reid on board, arrived at Trinity yesterday forenoon after a good run and will leave to return here this afternoon.
