DR. LEHR Dentist, 329 Water St.

THE ART OF CHEWING. Your whole system depends for its health and strength on the stomach. The stomach, in turn, depends on the teeth. The very foundation of health is therefore laid at the first step in food conversion—the act of chewing. Food improperly chewed enters the stomach in a wrong condition, and it brings about a wrong fermentation which causes first, indigestion, then kindred ailments. The proper chewing of the food will prevent these things. Chew your food plentifully.
