MOTOBILIA.

For example set this week by the City Club in taking for motor cars a number of the poorer children of the city is being highly commended and might be followed with success by other motorists. Every motorist knows that on every one of the residential streets—other than the main roads where the "nobs" live there are swarms of children of all ages who have nothing better to do than to play around these streets in the high the streets of this city and with which they will still until the City Council is placed in a financial condition to permit the really necessary street sprinkling and cleaning apparatus: being placed. The attention of every motorist to these children being there drawn by the fact that it is necessary to avoid travelling over dozens of them while running these streets. It has been asked "why don't these youngsters play in the parks?" The parks—Bannerman and Victoria—themselves a child's point of view, are not as playgrounds. Football and handball are not permitted in the parks, and what healthy children to walk about admiring the cars, which is about the only thing allowed to do in the parks. If motorists with spare time on their hands would take up some of these children and take them for a run, it would be a red letter day in most of their lives. And while the wonderful time up by the Rotarians will go down in the lives of those children who were their guests, it will be appreciated by many other children who are playing around the streets to-day, if they are given just a motor run with possibly an ice cream cone thrown in to "wet" it.

BITING!
Mr. Punch's critical eye has observed the case of a cyclist being fined for allowing a motor car to draw along without the consent of the driver, and he thinks that drastic measures will be necessary to check the growing practice of pedestrians being themselves pushed along without asking the permission of motorists.

Which reminds me of a sign-board on the highway.

Dalhousie University.

Halifax, N. S.
Arts, Science, Commerce, Music, Engineering, Pharmacy, Law, Medicine, Dentistry.

RIGHT VALUABLE ENTRANCE EXAMINATIONS.
Three of \$200, five of \$100 each. Awarded on results of matriculation examinations, September 27-28, 1922. One reserved for Halifax County, one for Cape Breton, one for New Brunswick, and one for Prince Edward Island.

LECTURES BEGIN.
Wednesday, October 4th.

FOR FULL INFORMATION.
Apply to the person, or by letter to the Registrar.

CAPTAIN WILLIAMS OUT OF TROUBLE.

"Since taking Tanlac I have gained twenty-four pounds and am feeling as fit as I ever did," said Captain William Williams, who has resided at O'Brien Lake, N.S., all his life. "For nearly two years I suffered from stomach trouble so bad I had forgot what it was to enjoy a meal. My appetite dwindled to almost nothing and what little I did eat soured and seemed like a heavy lump in the pit of my stomach. I was badly constipated and felt weak, worn out and good for nothing. Several of my friends told me what Tanlac had done for them and I tried it. It went straight to my trouble and now my stomach is in fine shape. I take pleasure in recommending Tanlac."

The motor car thief is again getting busy and the night before Regatta the cars of Messrs. Arthur Williams and Worsley were both stolen. This nuisance has got to be stopped and because there is no law on the Statutes of Newfoundland to actually "seize" the motor thief, a clause in the Motor Act to take care of this will be among the additions to the Act the Association will petition the House of Assembly for in October. In the meantime an article from the "Motor" may be of practical use to local motorists this season, and if it is too long for inclusion in to-day's column, we will ask the editor to kindly run it as a special article to-morrow. (With the great article to-morrow.—Editor.)

FOOTBALL.

Feldians 1—Guards 0.
There were so many attractions yesterday that the attendance at last night's football match was not as large as at previous League games. Those who were fortunate enough to be present, however, witnessed the Feldians beating their opponents by a score of one goal to nil. The Guards defended the western goal and the Feldians who lost the toss had to play against a strong breeze. By excellent combination and fast play they managed to score a goal shortly after the commencement of play. The Guards on the offensive tried to even matters but were unable to get past the Feldian defence except on a few occasions when Volsey, in goal, always cleared. The teams crossed over without further score. It was thought that with the wind in their favor the Feldians would pile up a good score. The Guards played a great defence game and always broke their dashes. Moore, who was in goal for the Guards, was called upon to save several difficult shots, and he was always right there. Thistle also did good work by clearing several mixups in front of the goal. The Quakers broke through several raids in Feldian territory but could not get past Tait and Rendell, who played a great game. The final whistle sounded without further scoring.

BASEBALL.

WANDERERS—LIONS.
To-night's League Baseball game starts at 6.45 sharp. The contesting teams are the Wanderers and Red Lions, and a good game is anticipated. Both teams are putting forward their best aggregations and a good brand of ball should be forthcoming. Of late the teams have shown considerable improvement and each player is putting forward his best efforts so that a strong lineup may be selected to meet the Grand Falls team when they arrive here on the 21st inst.

Choosing its Own Cloth.

A remarkable new dye-stuff has been discovered that will select which piece of material it will dye, and which it will not. By this means a white material can be placed in a bath of dye-stuffs and dyed two colors in one operation. This wonderful new class of dye-stuffs has been named "Ionamines."

"Ionamines," says Professor Arthur Green, the director of the research laboratories, where the discovery has been made, "will only dye silks, either real or artificial, but upon the materials they produce a considerable variety of shades."

"If we choose one of these new dye-stuffs, and mix it in a bath with another dye-stuff having a direct affinity for cotton and dye from this bath

KILL THE FLY!

The most practical and useful instrument and liquid SAN-O-SPRAY now on the market.

ELLIS & CO.,
