PAY OF MINISTERS

The well deserved tribute to Mr. Fielding, finance minister, has raised the question of the pay of Canadian public men. The fact that the friends of Mr. Fielding found it necessary to give this testimonial is proof that the pay of the public man is not quite what it should be.

A cabinet minister gets less than \$10,000 a year. The city of Edmonton is paying one of its officials \$10,000 a year. The pay of a president of a railway is about five times that of the premier of the Dominion. The heads of many financial institutions receive larger salaries than the prime minister and cabinet ministers who are directing the business of a nation.

It must be remembered, too, that the calls upon a public man are very much greater than upon a private person, and that a salary of \$10,000 does not really represent more than half of that amount in provincial affairs. The province cannot very well exceed the Dominion. The result is that the province of Alberta finds it difficult to get good deputies to work for the salary which the chief is getting.

The pension system was tried, but the people of the Dominion seemed to resent the sort of thing. The only thing left is for the ministers to insist upon higher pay for the cabinet ministers.

WHAT THE GOVERNMENT SAID

The public is very desirous of getting some statement of the government supporters of the government press the questions asked about the Alberta and Great Waterways deal, that was recorded with such solemnity a few months ago. The contentions of the insurgents have been maintained by the evidence of witnesses favorable to the government. The answers given by the government in defense of the scheme have been found by the evidence of the officials of the government or by persons associated in some way with the railway, in every instance, to be untrue.

In reply to the assertion that the guarantee was too high and that the road could be built for very much less than the estimate, the government says that the cost of construction throughout America. But evidence was given to show not only that the road could be built for almost half of the amount guaranteed, but that the company asked but \$13,000 a mile. Mr. Woodman, engineer for Mr. Cornwall, placed the estimate at \$11,000 a mile. Mr. Cornwall, who knows the country very well, was quite satisfied with that estimate. Mr. Pawker writes that the estimate is a little high. Dr. Waddell, who is nearest to the company, estimates that the cost of a much better road than that would be built for \$17,000 a mile. On the estimate of one set of engineers and Mr. Cornwall, the company would get something like \$1,000,000 out of the deal. But with Dr. Waddell's more conservative estimate the company would only make \$1,000,000 in the construction.

The government said the road was costing \$25,000 a mile. It seems, according to the estimate of most of the practical engineers, that the road will cost something like \$8,000,000 less than the estimate of the government. The mistake made by the administration is somewhat enormous.

In answer to the insurgents that they were high class in every particular and would mean a very fine line of road, Dr. Waddell, the A. & G. W. representative, replied that he would be ashamed to build a road according to the specifications which were drawn up.

The insurgents maintained that the government was dealing with promoters and not railway builders. To this the government replied angrily that the Clarkes were very excellent men, accustomed to big undertakings, or as the premier was accustomed to express it, "men of very high character."

The evidence has shown that the A. & G. W. was a myth, that the government really did not know with whom it was dealing, and that W. R. Clarke has refused to come to Alberta to give evidence in this transaction.

The insurgents argued that the economy was without security for the money that was being loaned. This has been shown to be the case without a doubt.

The insurgents complained because the province did not get the entire proceeds of the bonds. On account of the absence of Clarke the commission has been unable to determine whether or not Clarke shared in the \$750,000 or thereabouts which somebody got for the bonds. But the province lost that amount. Clarke was anxious about this, but Missy advised him that according to the act, he could not get it directly. Something else was done. The province lost the 10 per cent. Mr. Clarke declines to give any evidence. To the assertion that the A. & G. W. did not propose to operate the road when built, the members of the government pointed to the covenant on

object and end of organized nations is to prepare to butcher their neighbors. It is a pretty dull thing to see an imaginative person can't dig up a first class war scare.

If any small portion of the thought were taken by the able men of Great Britain to develop and promote the commerce of the mother land as there is to develop its fighting powers, we would hear but little of trade reverses and of the weakening of Britain's commercial supremacy.

One of the reasons for the remarkable progress of the United States, commercially, is that the people and nation were not troubled about wars and rumors of wars, but devoted all their time to promoting trade.

In Canada we have heretofore been devoting our attention to developing trade. Of course we are always prepared to make a demonstration and sing "Rule Britannia," and meant it, but we took it out in the singing and being prepared to do what we could if the time should ever come. Here and there we have a jingo who would do credit to the most blood-thirsty nation on earth. "Col. Deming" has recently created a little sensation by starting the fiery beacon and sounding the alarm, and talking like a man bred on gun powder, and occasionally a visitor from abroad strikes up a hit, but it never keeps us awake at night.

We are peaceable and are devoting our attention to growing grain and developing commerce, and we all can let us not turn aside to worship any of these strange warlike gods.

EDITORIAL NOTES

Halley's comet is also somewhat shy about showing much of itself to Albertans at this time, in this being somewhat like a certain W. R. Clarke.

Mr. Foster returned yesterday and invited them to say it to his face and there was much applause, both from the front benches and the back benches.

The government defenders, who are now favoring the cancellation of the railway contract with Mr. Clarke and friends surely have not forgotten the excellencies of the contract as pointed out by the government a few months ago.

NO MORE POLES FOR UNCLE SAM

It is not surprising that Uncle Sam has decided to abandon any attempt at capturing another pole, and has handed over everything to Great Britain who got the pole, and it was worth time before it was quite certain whether he captured it once or twice. He sought the northern seas for many a day, and after he got it, he found that he had really got nothing but trouble on his hands. When some enthusiastic person, after a rather heavy dinner, waved the north pole aloft and flourished it a bit, and announced that Uncle Sam should have the pole, there was a little enthusiasm over a south polar expedition. But the enthusiasm died very rapidly. It cost money to discover poles and it brings in nothing except some coin to the discoverer, and it brings in little to him if another fellow with a bit of nerve and a stretch of imagination gets to the lecture platform first. The United States has awakened to the fact that it does not even own the North Pole, because Cap. Bernier is in possession of all the northern seas. Of course it makes but little difference who owns it. It cannot be described as in a very strategic position.

Uncle Sam could have had the fun of a South Polar expedition for a certain amount of money, but it didn't seem to be worth it. In all probability the British will discover the South Pole, and the British lion will roar himself and the cubs will roar a bit, and then it will be over. May it come soon.

ALL ROADS LEAD TO WAR

A despatch from Europe tells of the alarm of some countries because France is hoarding up money in the Bank of Paris. That is regarded as a sure sign of war.

A despatch from Europe tells of the alarm of the different countries because Germany is spending money rather lavishly. That is looked upon as a sure sign of war.

It is rather surprising to people in this country that all roads lead to war. All rumors lead to war. Everything leads to war. If a nation spends, it means war. War sets it both coming and going.

In this country we are beginning to be amazed at the hold that Jingoism seems to have upon the European nations. To many it would seem that the

Sale of Linens

Beautiful Doylies and Sideboard Covers Greatly Reduced

HERE'S the most important news to thrifty housewives in today's paper. It's the story of a big special purchase of handsome Japanese linens and means generous savings to those wide-awake shoppers who are going to take advantage of this sale tomorrow. Never in the history of this popular linen store have we marked such beautiful linens so low. It's the best chance any Calgary woman has had to add a few extra doylies to her linen closet for so little. The quantities in each case are not large, so take the hint, and avoid disappointment.

Doylies - Handsome lace and drawn work squares, 20 by 20 inches, into beautiful designs, only 120 on sale. See them in the window. Regular 75c. Wednesday 50c.

Doylies - or Japanese squares, 36 by 36 inches, and in exquisite designs, beautifully worked, splendid value at our regular price, \$1.50 each. Wednesday \$1.00.

Sideboard Covers or bureau covers if you like, hand-embroidered designs in size 20 by 24 inches. Just 2-1/2 dozen to go on sale at tomorrow's price. Regular \$1.35. Wednesday .95c.

UNDERTAKES VOYAGE IN STRANGE CRAFT

Two Logs and a Biscuit Box Furnished Vessel for This Marine

Nelson, April 30.—On its voyage down Kootenay Lake yesterday the steamer Kuskanook sighted a strange craft, a raft made of a couple of small logs and a biscuit box. Frank Karee, a Finlander, had set sail from Kootenay Landing for Rossland to see his brother. His crew consisted of a single pole, which was tacked a shingle and his provisions for the voyage consisted of five old bones and a bag of salt.

Favored by the current the lonely navigator had then made four miles of his voyage. After landing its passengers for the crew the Kuskanook put about and overhauled Karee and took him aboard. He was evidently delighted, and then ensued one of the most interesting courts that ever sat in the county of Kootenay.

The boat returned to the Landing to wait for the westbound train and Mr. Charles Wright, justice of the peace of Kootenay Landing, and Harry

But not any more. Now you do it with No-mor-dust.
Your rugs and carpets lie just where they are. No-mor-dust lifts the dust out of them, freshens their colors and leaves them clean.
Just to see it done will be a revelation to you.

For Any Floors
For linoleum and oilcloth floors No-mor-dust is just as good as it is for wood floors and carpets. It takes the dirt off, gathers up the dust and freshens the colors.
Unhealthy germs are annihilated by No-mor-dust. All dust harbors germs. No-mor-dust does more than pick up the dust and dirt. It kills the germs. While No-mor-dust is pleasant and absolutely harmless, it has great germicide, disinfectant and purifying powers.
No injury of any sort can come to carpets, rugs or any kind of floors by cleaning them with No-mor-dust. No-mor-dust cannot hurt the colors or the texture. It has no injurious chemicals to fade the carpets or stain the floors.

Nothing Else Like It
No-mor-dust is not like anything else you have used before. People who see it work are dumb with amazement.
It does not just "lay" the dust and keep it from rising. It picks up the dust and grit and carries them away.
That is not any exaggeration. That is exactly what No-mor-dust does.
And that is what we are going to prove to you.
No-mor-dust picks up every tiny speck of dust and every grain of dirt—grit and keeps hold.

Used in Office Buildings
Superintendents of big buildings use No-mor-dust because it saves constant dusting, and therefore saves labor, which means money. If the building superintendent can

save money in this way, isn't it worth while to save your time and labor? Isn't your labor worth money to you?
It looks like green sawdust. It comes in a round green box. You don't have to wet it. No-mor-dust is ready to use.
The big 15c box of No-mor-dust is enough for a week in an average size house. It takes all the dust out and it keeps the rooms dustless.
No Trouble to Use
Just spill it out of the box and make a line of No-mor-dust along one side of the room. Then sweep it across the room with an ordinary broom.
When cleaning carpets with No-mor-dust, sweep with the grain of the carpet.
Where to Buy It
If your grocer has No-mor-dust send a postal to Edger P. O'Brien & Co., 318 Michigan Street, Buffalo, and a package of No-mor-dust will be delivered at your door, 10c C. O. D.
Remember we will not let you risk one penny when you make this test of No-mor-dust. We want you to know—by your own experience, right in your own home—all that No-mor-dust will do for you. Nothing that you read about No-mor-dust will give you such a clear idea of how it saves work, saves time, saves carpets, etc., like one single day's use of No-mor-dust in your own home.
Costs You Nothing if Test Fails
If no-mor-dust, used in your own home, under your own broom, does not fulfill every statement made here, and if after you have given your first package of No-mor-dust a fair trial you are disappointed in any way whatever—you can write to us, just say that you tried it fairly and are disappointed—send the name "No-mor-dust Chemical Co." out from the package—and immediately we will refund to you the price you paid for your first package, plus the postage you have used in writing to us.
