Not only delicious-but there's "life" in

Grape-Nuts

Try this experiment yourself. Take some Grape-Nuts direct from the package. Hold the granules in the palm of your hand under sunlight or an electric bulb. You will notice tiny shining particles of light on the granules -the starch of the grains transformed.

Then do the same with some other prepared food-any other prepared food. You don't see these glistening particles.

"There's a Reason"

The wonderful taste-the wonderful nourishment in this great food is due to the fact that in addition to the sweetness of the whole wheat is combined the delicate flavor and food value of malted barley.

This gives Grape-Nuts two great factors that no mere wheat food can possess. The delicious zest of malted barley imparts a savor that is universally liked; and beyond that, the barley contains a digestive (not in wheat) which, with long baking, transforms the starch of these full grains into a form of sugar which shows on the goldenbrown granules.

If you haven't tried Grape-Nuts food you have a treat in store. It not only appeals to the appetite, but is a powerful rebuilder for body and brain.
