

Made in Canada

Above photo shows why we dare Guarantee Barrett Specification Roofs for 20 Years—

ABOVE is a photograph of a cross-section cut from a Barrett Specification Roof.

Note its great thickness.

Note the five alternating layers of Specification Pitch and Felt Waterproofing.

Note the heavy wearing-surface of Slag bound with Pitch.

No other type of roofing approaches a Barrett Specification Roof in the amount of protective waterproofing material used in its construction.

The weight of this waterproofing material is about 250 lbs. to 100 sq. ft., compared with 175 to 100 lbs. used in other types of roofs.

The wonder is *not* that we dare guarantee such a roof for twenty years, but that some people still buy light-weight, poorly constructed roofs and expect them to give long and satisfactory service.

Lowest Cost per Year of Service

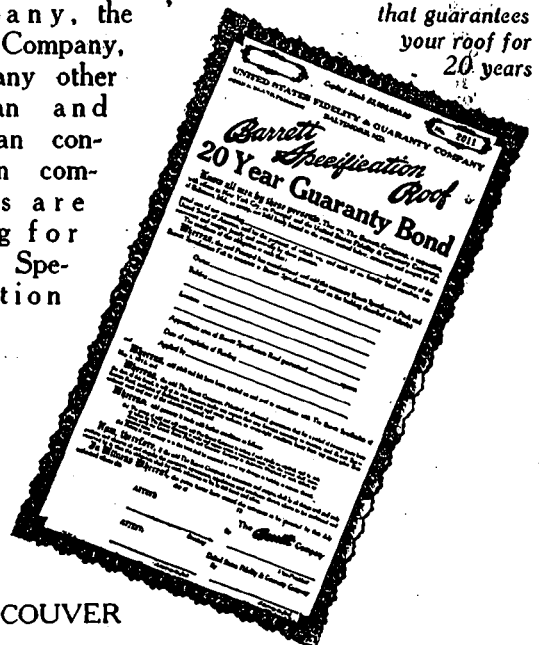

The buyer naturally asks, "Do such roofs cost more than others?" Our answer is, "No, they do not."

A copy of The Barrett 20-Year Specification, with roofing diagrams, sent free on request.

The experience of many years has proved that Barrett Specification Roofs *cost less per year of service* than any other kind. It is because they give such long service at such low cost that this type of roofing now covers most of the permanent structures of the country.

It is because of these facts that leading architects, engineers, and roofing contractors everywhere are co-operating with us in the better roofs movement and why large construction companies like the Turner Construction Company, the Fuller Construction Company, the Austin Company, and many other Canadian and American construction companies are strong for Barrett Specification Roofs.

This is the bond that guarantees your roof for 20 years
