from this "export drive" of 1982-83, but the government's policy of export promotion is expected to continue in 1984. The government's policy of export promotion is expected to continue in 1984.

Canadian Trade with Korea: In 1983, Canada's exports to Korea were valued at \$1.1 billion, a 10% increase over 1982. Imports from Korea were valued at \$1.4 billion, a 15% increase over 1982.

Canada's exports to Korea are concentrated in a few major products, including machinery and equipment, chemicals, and foodstuffs. Korea's exports to Canada are concentrated in a few major products, including textiles, footwear, and clothing.

The Canadian government has been actively promoting trade with Korea, particularly in the areas of machinery and equipment. This is part of a broader strategy to diversify Canada's export markets and to increase its trade with Asia.

Canada's trade with Korea is expected to continue to grow in the coming years, as the Korean economy continues to expand and as Canada's trade with Asia becomes increasingly important.

The Canadian government has been actively promoting trade with Korea, particularly in the areas of machinery and equipment. This is part of a broader strategy to diversify Canada's export markets and to increase its trade with Asia.
