PART I.—FARM DAIRYING.

	PAGE.		PAGE.
Absorbents for dairy stable	19	City dairy companies	102
Acid measure for Babcock test	51	City dairy companies—advantages	102
Adulterated milk, testing of	56, 57	City dairy companies—disadvantages	103
Agents of dairy farmer, plants and animals	10	Cleaning stable	19
Air should be pure at milking time	41	Cloudy or burnt readings	53
Animal food valuable and easily digested	10	Colostrum	42
Ash of milk	46	Color of milk	46
Babcock, Dr. S. M.	50	Coloring cream	87
Babcock test	50	Cooling milk	60
Boiling point of milk	47	Composition of butter	92
Bottles for Babcock test	51	Composition of milk	43
Box stall for sick cows	19	Corn silage	35
Buildings for dairy farm	11	Cow:	
Buttermaking does not rob soil	13	Size	21
Buttermilk	10, 54, 61, 93, 96	Training	21
Butter, scale of points for judging	92	Selection	21, 23
Calves	19, 29, 31	Constitution	22
Canada well suited for dairying	12	Digestion	22
Canadians favor dairying	12	Milking capacity	22
Caring for milk, main points	61	Beauty	23
Casein	45	Record—6,000 lbs. milk, 250 lbs. butter	23
Cement floors in stable	17	Ayrshire	24
Centrifugal tester	51	Canadian	25
Centrifugal force, law of	75	Guernsey	26
Certified milk	105	Holstein	26
Cheese for farm dairy, utensils	97	Jersey	27
Cheese for farm dairy, making	99, 101	Short-Horn	28
Cheese testing with Babcock	55	Sick, isolate	31
Churned samples, testing	55	Chewing bones	31
Churning	86, 88	Shade or stable in hot weather	31, 32
		Not exposed to cold or storm	32
