World Office, Saturday Evening, Sept. 30. was another spasmodic upward swing to the Porcupines in to-day's trading, the gold mining issues developing strength on more sustain-ed buying, presumably for the short

day's trading, the gold mining issues developing strength on more sustained buying, presumably for the short interests.

The market showed a firmer trend at the opening call and made further advances in the early trading, until values showed material gains over the preceding session. A portion of the advance was, lost in the later dealings, however, when the usual profit-taking movement developed.

The strength in Dome Extension was the feature of the market, these shares selling up 3 1-2 points to 65 un-The market showed a firmer trend at the opening call and made further advances in the early trading, until

he feature of the market, these selling up 3 1-2 points to 65 unresponsible demand, and closing ically at the top figures. Short rs were reported to be buying

the stock.

Vipond was another strong spot in the cheaper issues, selling above 40 for the first time in a number of days.

Hollinger and Rea started out well. but later lost much of their buoyancy and at the close showed but little change from the preceding session.

The former issue sold as high as \$11.20, but was back to \$11 at the close. Rea moved between \$2.50 and \$2.60.

The market thruout was dull, but in the main firm, and sentiment brightened up somewhat in consequence.

Porcupine Notes

The former has five claims left in the block, from which the latter company carved out three. The McIntyre was visited this week by members of the directorate. They found Engineer Harris scooping out the rock. Both main shafts are being wid-

PULPWOOD INDUSTRY A BIG THING UP NORTH

Into Timber Tracts-Agitation to Change Laws.

PORCUPINE, Sept. 27 .- (From Our Man Up North.)-One of the big in-

preparations are now on to build a power plant.

Mr. Miller has many pulpwood tracts under his eye. When the mill is up and ready to run timber will be needed as a feeder in addition to the block held under reservation. The Larder Lake district may be drawn on with a plant in that section, too. This section is being looked over this week.

With a hundred thousand a month coming out of the pulpwood to the land-owners, in addition to the production of mines, the north country would spring into prosperity as if touched by magic.

The pulpwood destroyed by fires this year would, had it been placed on the market, afford a revenue sufficient to the the clearing and building up to the clearing and building up to the clearing and sufficient to the placeting and su

would spring into prosperity as if touched by magic.

The pulpwood destroyed by fires this year would, had it been placed on the market, afford a revenue sufficient to aid in the clearing and building up of every farm in the pulpwood districts.

Chas. Fox.

PORCUPINE GOLD GAMP

month, and as a result of the extensive operations since the fire, the possibilities of Porcupine loom up bigger than ever before. There is no question mines are rapidly nearing the producting stage. Underground work systematically carried forward for two years has blocked out vast quantities of ore of the known to carry values running up into the scores of million of dollars. It is announced that the T. & N. .) Railway will soon inaugurate a direct train service to Porcupine and the three diamont of the world's greatest gold to start an extension of the world's greatest gold to start distance of the students of the world's greatest gold with the present distance of the students of th train service to Porcupine, so that passengers may leave Toronto at night and land in Porcupine, without the present tedious delays, early the next afternoon. When this service is put on there is no doubt that people will go in by the thousands to see the wonders of Porcupine.

Dome Leads in Recovery. The recovery of the camp from the effects of the fire was undoubtedly lead by the Dome Mines Company. This premier company in a few days after the fire announced that the extensive was nearing completion, would be im-mediately rebuilt. This involved the expenditure of several hundred thousands of dollars. Nothing could more impress the business public as to the future of Porcupine than this unanimous decision of the large capitalists. passengers have to make that trip now.

Chas. Fox.

The funeral will be held on it is looked for in the near future. At the north of the property an importthe north of the property an important development has taken place, as just across the line the North Dome

> The Dome Extension is about ready to resume operations in its main shaft, as the compressor is on the ground and the machine drills will soon be put to work to carry out the plans already 40,000 made for opening up the large 35 foot 5,882,055 vein beside which it is being sunk. 4,621,888 This vein carries a vast quantity of 1,072,898 first-class milling ore, and when it is 47,000 cut at depth, as it will be, not long after operations begin, the news is ex-58,430 pected to be of high importance to the 151,950 entire camp. The main shaft is now down 115 feet, and the vein wil be cut either at the 150 foot level or the 200 1,000,180 foot level. Previous to the fire the 1,000,180 shaft was being put down at the rate

117,232 of four feet a day. Inspected South Lorrain. Mr. J. B. Tyrre'l, mining engineer, has recently returned from a visit to South Lorrain, where he visited the Keeley

Tone of Recent Developments in the Gold Camp.

Fires have made big inroads into the just as the mine itself promises to retimber tracts, and because of this fact main in the lead in the mining camp men are agitating that the laws gov- The shares have already demonstraterning the handling of timber assets ed their forcible resistency and it is were so revised that farmers and land highly probable that a repetition of owners might get a slice of the product before it is destroyed. Could a farmer get all that is in the pulpwood and lumber on his lands before the timber is wasted, he would have a big asset to help put him on his feet for the clearing and development of his lands. One of those who see a future in the pulpwood business is Alex Miller, who is at the head of the Sturgeon highly probable that a repetition of former startling moves will be witnessed. A physical report on the property is in course of preparation by A. P. Robins, M.E., who is in charge, and it is stated, on what is taken to be good authority, that this statement will be highly satisfactory to shareholders. Mr. Henry Timmins is more han satisfied with the development, and most sanguine as to the who is at the head of the Sturgeon ment, and most sanguine as to the Falls Water Power Company, where future of the property, believing that preparations are now on to build a Hollinger will be one of the big gold

is now noticeable, and news may be expected at any time of rich strikes. In reconstructing the camp every precaution has been taken to preclude a repition of fire which twice burned over the property.

over the property.

The shaft on the Rea property is now down 230 feet and will be continued to the 300 foot level, where a drift will be run. Drifting on the 200 foot level has developed a vain 42 inches wide and for a length of 260 feet, and shows and for a length of 260 feet, and shows values as high as \$25 per ton.

At the West Dome the fire house and machine shop have been repullt of fireproof material. The break houses to accommodate 100 men are practically ready, while the office building is nearly finished. During the reconstruction of buildings prospecting on the big value of the fortunes of Porcupine were temporarily eclipsed. But while the contest went on month after month, development work at Porcupine, the little heard of has gone on month by DARD.

At the West Dome the fire house and kighlanders kindly assisted by supplying range officer, and the Grenadiers and kighlanders kindly assisted by supplying range officers and register keepers. Publishers of LIMITED
