THE WEATHER

Meteorological Office, Toronto, Sept. 17, 3 p.m.—The high pressure area is situated to-night over Ontario and Quebec, and pressure is rising rapidly over the Maritime Provinces.

Probabilities. Lower Lakes and Georgian Bay—Fresh to strong easterly to southerly winds; showers, local thunderstorms, but partly fair and a little warmer.

THE BAROMETER. Time. Ther. Bar. Wind. Noon. 70. 29.79. 10 E. 2 p.m. 71. 29.81. 10 E. 4 p.m. 72. 29.83. 10 E. 6 p.m. 73. 29.85. 10 E.

STEAMSHIP ARRIVALS. Sept. 17 At From Caledonia. Glasgow. New York. Patricia. Plymouth. New York.

TO-DAY IN TORONTO. Sept. 18. Sir Dan C. Morris addresses board of Q.O.R. parade—Armories—S.

BIRTHS. HUNT—On Sept. 15, 1907, at "The Cottage" Hospital, Wellesley-street, Mr. and Mrs. George Harcourt Hunt, daughter.

MARRIAGES. WATSON—YOUNG—At "Algonquin Lodge," Bradford, on Saturday, Sept. 14, 1907, Laura Winifred, the young daughter of Rev. Egerton R. Young, was married to Dr. Herbert E. Watson, by Rev. E. Ryerson Young, Jr., of Malton, and Rev. J. A. Lons, P.H.D., of Bradford.

DEATHS. CATHCART—On the 17th inst., at her residence, 88 Arthur-street, Sarah Kennedy, widow of the late William Cathcart.

Funeral on Thursday at 2.30 p.m., to Mt. Pleasant Cemetery. ELLIS—On Tuesday, Sept. 17, 1907, Sarah J., widow of the late James W. Ellis, funeral from the residence of her son, 232 College-street, Thursday, Sept. 19, at 3.30 p.m., to Mt. Pleasant Cemetery.

TITMILIN—On Monday, Sept. 16, 1907, at the General Hospital, George C. Titmilin, in his 88th year.

Funeral services at 2 p.m. to Norway Cemetery, from Washington, & Annie's undertaking parlors, corner Queen and Broadview-avenues.

YORK LOAN CREDITORS. Counsel for the creditors of the York County Loan & Savings Co. held a conference yesterday and later attended a meeting of the official referees at Osgoode Hall, to ask him to hold daily sittings to deal with the classification of creditors and other matters arising now that the affairs of the defunct company are ready to go before the court for adjudication.

Mr. McLean said he recognized the necessity of immediate action, and promised to facilitate matters to the best of his ability, having due regard for the interests of all parties.

POSTMASTER IS ILL. Thomas C. Paterson, postmaster, who is ill with pneumonia, was reported as resting at an early hour this morning, and it is expected that he will be able to resume his duties on Thursday.

THE PEASE SYSTEM. The Pease system of heating has been installed in thousands of homes, churches and schools. Do not experiment with unknown, untried systems. Such practice is costly and unsatisfactory.

Come with Peel Old Boys to Brant on Sept. 20 at 10.30 a.m.

THE AUTONOLA

A physician, who purchased a Bell Autonola some months ago, said to us the other day:

"We would not give up our Bell Autonola now under any circumstances. No member of my family can play, but with this magnificent instrument in the house all of us can play the kind of music that we like. My son plays the latest popular songs; my daughter plays her classical favorites; my wife plays the old tunes of her childhood; I play all of them. We have become good critics, and I profess that within six weeks only the best music will be heard in our home. So much for the educational value of the Bell Autonola."

This wonderful instrument is a revelation to all who see it. With it anyone can play with precision and feeling. It is TWO PIANOS IN ONE, for it can also be played by hand in the usual way.

BELL PIANO WAREHOUSES 145 YONGE ST.

Body Identified. A letter has been received from Chief Fire Ranger Campbell at Enghelhart to the effect that the body of the man which was found in the Black River near McDougall's Chute about ten days ago, has been identified as that of M. G. Andros Laurent. He formerly lived at 335 Notre Dame-street, Montreal.

Peel Old Boys are going to Brant on Friday, Sept. 20, at 10.30 a.m.

ONTARIO HEALTH BOARD NEEDS GREATER POWER

Municipalities Ignore Suggestions—Word of Warning as to Water Services.

"I feel it a duty," stated Dr. Hodgets, chief health officer of the province, in the report he submitted yesterday afternoon at the quarterly meeting of the provincial board of health, "to direct your attention to several matters which in my opinion are of public importance from the standpoint of the health of the people."

"For some time I have felt the need which is some nations, and which is taken by this board, in the promulgation of standards, not only as regards the milk itself, in respect to butter-fat and lactose, but also as regards the cows, the cleanliness of the cowsheds, the purity of the water used, the collection, storage, transportation and delivery of the milk. The sanitary conditions in this province is by continued inertia on the part of this board to allow the agricultural department to take a lead which is in other portions of the civilized world, where the health authorities have taken steps to safeguard the public interest in respect to the housing of cattle, the collection, storage, transportation and delivery of the milk while the minimum standards have been laid down for the protection of the lives of infants and of children, this board should take some firm and decisive stand in this matter."

The continuance of smallpox during the past summer had emphasized the fact that the province is not a densely populated one, and so long as this continued little hope of the cessation of this disease could be entertained.

"The smallpox epidemic must be regarded as a small coterie opposed to vaccination have lured a small portion of the public into a hypocrite state, from which they may be rudely awakened by a virulent outbreak of variola similar to the epidemic at Montreal in 1885-86," declared the report.

Ignore the Board. The custom was becoming more general to ignore the decisions and recommendations of the board in regard to the installation of water systems.

This was illustrated in two instances. A town submitted plans for a supply which, at certain seasons, must be contaminated, an increasing, not a diminishing, danger. The board approved with the proviso that the water be filtered, but this system was not installed without this safeguard.

The board, too, had approved of a town council's plans, but instead of taking these plans into consideration, another source, which was contaminated, and which had already been condemned, had been selected.

Legislation, impossible for bonds to be floated unless the entire scheme had been approved by the board, or possibly by the local council, and individually liable for damages. Similar remarks were held to apply to the construction and installation of sewerage systems.

The water from the approved source, treated at home instead of being taken to the water works, was a great instance of this kind was happening from time to time.

The remedy must be sought in more stringent legislation, with heavy and increasing fines for continuance," said Dr. Hodgets.

He also sounded a note of warning to municipal authorities regarding the doubtful quality of water for pure food purposes. The demand for guaranteed pure water. This would in many instances, be no means prohibitive. Personally he knew of but few public water supplies in the province which were of this quality.

"Moreover," he asked, "how many cities and towns in Ontario possess an adequate supply of water as required for all purposes? Investigation leads me to think that there will be many cases of shortage."

Dealing with Cholera. A strong report, he said, should be made by county and city authorities for the cure of consumption—either by dispensaries with nurses, day camps, or by the use of houses for advanced cases. What had been done in Ontario, chiefly through charity, had been entirely inadequate, and the outside of the work, but the results obtained had been very encouraging.

"The municipal authorities must also be urged to hold a meeting to discuss the work must be not only generally undertaken but also be conducted under the advice and possibly the supervision of the health authorities," he declared.

The cost must be heavy, but the calculation, that a provincial contribution of \$50,000 annually for 20 years to any one institution would result in total suppression, is a wild statement. The great cost is the one great difficulty, and is perhaps the chief reason for the failure of the conclusion that governments—municipal, insurance and benefit companies, church and charity, must wait before great results can be anticipated.

In conclusion Dr. Hodgets touched upon indications of incompetency by local boards of health dealing with nuisances, on the decision of the attorney-general in a Brantford case, permitting a child to be isolated and taken to the hospital, virtually nullifying the scarlet fever and diphtheria regulations of 1903, as rendering advisable the completion of practical rules, as a guide to the health authorities in such cases, and on the need of education at schools, etc., in lectures in "first aid," particularly in cases of drowning.

The Day's Business. The following reports were submitted by Dr. R. W. Bay. On smallpox throughout the province; on the inspection of lumber camps, with particular reference to the outbreak of typhoid fever at Napanee and Canada, and on the outbreak of anthrax at Bracebridge.

The application of East Sandwich for permission to deposit raw sewage in the Detroit River, some 1500 feet above the intake pipe of Walkerville water-supply, refused.

The complaint of J. D. Bartlett of Orillia, touching a nuisance said to be created on his property thru a neighbor's domestic sewage, was referred to the local board.

The application of the Township of Yarmouth regarding the pollution of the Kettle Creek by sewage from St. Thomas, was referred to the local board.

Action upon a petition by certain residents of Ottawa, regarding a nuisance created by the Young rendering by the local board, which has full power in the matter.

FINED FOR SUBSTITUTION

Interesting Proceedings in the High Court of Justice Against Toronto Druggist.

A case of interest recently came before the Honorable Sir William Mulock, Chief Justice of the Exchequer Division of the High Court of Justice, in which C. B. Graham, druggist, Toronto, was perpetually restrained, and fined \$50.00 and all court costs, for substituting a mixture of his own manufacture for the well-known and meritorious preparation, Compound Salutate.

Compound Salutate is an article of merit, the formula of a well-known Physician, put up in one-ounce bottles only, the contents of which is to be added to one ounce Fluid Extract Dandelion, and four ounces Compound Syrup Sarsaparilla, and taken in teaspoonful doses after meals and at bedtime. This valuable preparation has proven to be most beneficial in the treatment of Kidney and Bladder troubles, and Rheumatism.

It is of course the large demand for this prescription which caused the druggist mentioned to substitute the preparation, but we trust there will be no repetition of this nature in Canada.

WOMAN SLAYS CHILDREN WITH HAMMER AND KNIFE Shows Remorse for Mad Act Which She Calls a Blood Sacrifice.

MIDALE, Sask., Sept. 17.—On Saturday afternoon Mrs. John Anderson, wife of a farmer residing near here, took her three children, all boys, to a field, and there knooped them on the head with a hammer, after which she cut them up in a horrible manner with a draw knife.

It is supposed the murder is due to religious mania. She is 45 years of age. Her husband, Jack Anderson, was not at home at the time the crime, was committed. She believes it was some kind of blood sacrifice.

JAMIESON'S BODY FOUND. All Doubt Removed as to Fate of Young Missionary.

PARRY SOUND, Sept. 17.—A tug arrived here this morning, from French River, bringing the news of the finding of the body of Cyril Reginald Jamieson, the brilliant young Presbyterian missionary, who was drowned in the Bad River on Saturday, the 7th instant.

He had been on his way to a conference, passed thru here to-day on a train, and was on his way to bring the body of his son home.

NEW USE FOR SEPTIC TANKS Will Be Tried to Obliviate Cheese Factory Nuisance.

Complaint is frequently made of nuisances being created from the waste of cheese factories and creameries, but chiefly from the former, and the health department has decided to treat such waste in two places in the province by means of septic tanks, as an experiment, for this method has never been tested elsewhere in these cases. Although these tanks have been used for the treatment of town and domestic sewage, and of certain kinds of factory waste, tanneries for the most part, they have not been used for the treatment of the waste of cheese factories and creameries.

Complaint is frequently made of nuisances being created from the waste of cheese factories and creameries, but chiefly from the former, and the health department has decided to treat such waste in two places in the province by means of septic tanks, as an experiment, for this method has never been tested elsewhere in these cases.

CENTRAL CANADA FAIR OPENED Live Stock Display is Feature of the Exhibition at Ottawa.

OTTAWA, Sept. 17.—The Central Canada Fair was opened yesterday by Sir Wilfrid Laurier with ideal weather conditions and fair crowds. People have been coming into the city to-day from all parts, while the exhibits completely occupy the spaces set apart for them.

The live stock display is a feature of the fair. Messrs. Smith and Richardson of Columbus, Graham Bros. of Claremont, D. Dunn & Son of Beaverton, and Thomas Hayward of Millbrook have good stables of heavy horses and hackneys. Smith and Richardson won two firsts to-day in Canadian-bred horses. Light horses are well represented.

There is a big display of Ayreshires from Quebec, Holsteins from Nova Scotia, French-Canadian, Shalloways from Guelph, Angus, shorthorns, Jerseys and Guernseys. W. C. Edwards' bull, Bertie's Hero, won first and second prizes in the aged class. A hopeful feature is the individual efforts of local men in Quebec and Eastern Ontario in showing a few good animals in the various classes.

Quebec Hay Crop Light. In sheep and swine there is a full list. The Chester White swine are largest in point of numbers. Featherstone in Yorkshires and Durham in Berkshires are carrying off the honors. The report that sales are good, and that there seems to be little evidence of hard times among the farmers here. Rather from Quebec comes a good account of pasture and hay crops. Poultry exhibits are large. The dairy display is not as large as one would expect to find in the surrounding dairy country. Still, it is the responsibility of the eastern men to the inducements for fat stock, as James Lea of Greenbank has attracted much attention. Fat Stock Sale.

The committee working upon the next winter's fat stock sale met to-night to further the work. It is the intention of the government to make this sale of unusual interest.

Home-seekers' Excursions on C.P.R. Sixty-day return tickets to all northwest points at very low rates, good going on excursions leaving Sept. 18, Oct. 3 and 22. Comfortable berths in tourist sleepers at small extra cost. Full information from all C.P.R. Agents.

Hotel Strathcona, Niagara-on-the-Lake, will remain open during September. Special low rates from now on. J. Tasker, manager.

TOO TRIVIAL FOR SESSIONS. GIFT TO NEW-CHURCH.

Jury Loses No Time in Discharging "Twelfth" Celebrant. Three Thousand Dollars for St. Mary Magdalene's.

William White, an Orangeman, appeared in the sessions yesterday, charged with obstructing the police at the corner of Queen and Jarvis on July 12. He was acquitted.

Referring to the above, a prominent court barrister remarked that such cases as the above should never reach the court.

"It is foolish to send such cases over to the sessions when they should be finished in the police court."

James Richards, a Pullman porter, accused of stealing \$1 from Henry Porter, who was in a sleeping car coming from Montreal, was acquitted in the sessions yesterday. T. C. Robinson defended.

The following true bills were returned by the grand jury: Angus Cameron, Samuel Henry, Robert Allen, assault; Douglas, indecent assault; Frank Shipman, assault.

Will Talk on Housing Problem. John C. White of Chicago, an expert on the housing problem, in big cities, will address a meeting of aldermen and those interested in the problem in the council chamber, city hall, next Wednesday night.

Meaford Operators Strike. MEAFORD, Ont. 17.—There is a strike on in the Bell telephone office here, all the operators having walked out, for higher wages.

The trouble is strictly local, however. "But this is not the case. The evidence of the engineers and the conductor stand by themselves, unopposed by any other testimony, nor has any suggestion been made that might have been of use to them."

"No one has suggested that the train was running away, for instance, or that thru any defect in construction, it was unmanageable. The engineer and the conductor were contradicted by that of Mossop and Henry then, perhaps there might be reason for a doubt in your minds as to who was telling the truth."

Unopposed. "But this is not the case. The evidence of the engineers and the conductor stand by themselves, unopposed by any other testimony, nor has any suggestion been made that might have been of use to them."
