INCREASE DOES NOT PLEASE YORK TOWNSHIP

The action of the equalization committee of the county council yesterday in raising the rate from \$121 per acre to \$127 in York Township is certain to provoke a hot debate.

The increase is considered all the more radical by reason of the heavy losses the township has sustained by the suburbs becoming annexed to the city, reducing the assessed valuation by \$1.200,000. Some 500 acres of suburban property has been annexed, and the county fathers, by a strange process of reasoning, argue that annexation has increased the value of county.

The regular monthly meeting of the Ratepayers' Association will be held in the town hall to-morrow (Saturday) night at 8 o'clock sharp. Municipal and other matters will engage the attention of the meeting, to which all are invited.

EARLSCOURT.

EARLSCOURT.

Worth Its Weight in Gold TO WEAK MEN

This is the way my Patients write about

Dr. McLaughlin's Electric Belt

DR. McLAUGHLIN,: Dear Sir,—The Belt I purchased from you DR. McLAJGHLIN.: Dear Sir,—The Belt I purchased from you has done me all kinds of good; although I had very little faith in it when I purchased it, but in order to give it a fair trial I threw away all medicine and used nothing but the Belt, and it certainly did its work. I can now do as much work as ever without being tired out, and have only worn it a very short time.

My way of restoring strength is different from others. It is my own plan, and is as simple as anything I find a man suffering from stomach trouble, arising from a weakness of the organs of digestion and assimilation. Now, what is the use of pouring drugs into that poor stomach? It does not want drugs to force an action. It wants strength. You know there is not an organ in the body which will not do its work well if it has strength. You will never feel a pain or moment of distress unless some part of your body is weak. Remember that, and don't

paralyze your poor stomach with poisons. My plan is to give strength to the part that is ailing. I do that, and the trouble is gone before you understand why. My treatment is success in any case where strength is lacking, whether in the nerves, stomach, heart, kidneys, liver or any other part. My appliance gives a soothing, constant electric glow, which is taken by the body just as a sponge takes up water. It cures weakness in any guise, as well as any other form of pain. My cures prove the truth of my argument.

I don't think there is any case of weakness, failure of vitality, or of any trouble resulting from the imperfect action of any organ of the body that I can't cure. Of course, I do not cure all cases, but I do cure any case I undertake. I have such confidence in my treatment that I WILL CURE YOU FIRST AND YOU CAN PAY ME AFTER THE WORK IS DE

All I ask is that you will secure me while you are using it. I don't ask you to take any chances. I am willing to do that, My strongest arguments are the letters from prominent people whom I have cured. Every man or woman who comes into my office gets My strongest arguments are the letters from prominent people whom I have cured. Every man of woman who comes into my omce gets a practical illustration of my method of cure, and goes away convinced that the claims I make for my ELECTRIC BELT ARE TRUE. After seeing original letters from the cured (letters I am permitted to exhibit) their doubts are dispelled. They know that I have not only proven that electricity is the substance of life and organic vitality, but I have perfected the best known appliance in the world for replenishing that

My Electric Belt is the result of scientific study, coupled with experience and mechanical skill. I am an enthusiast, you say. Why should I not be? I have the gratitude of thousands of people who have been cured by my Electric Belt after the failure of the best physicians. I am enthusiastic because I know that I offer suffering humanity the surest cure for the least expenditure of money that is known to-day. I have gained my success by learning how to treat my patients and then curing them. I underexpenditure of money that is known to-day. I have gained my success by learning how to treat my patients and then curing them. I understand the action of the current on the human system. My years of experience have taught me how to apply electricity. I charge nothing for my knowledge, knowing that it helps me. My patients are my friends. They are advertising my business.

You can talk with the men and women who have been cured by my treatment, and that's worth considering. I might preach for years in my efforts to gather converts to my way of curing disease, and nobody would pay attention to my arguments, but when I tell you I have cured your neighbor, Mr. A. Smith, or your friend, Mr. Johnston, and you can go and ask them about me and they tell you, I have cured have cured your neighbor, Mr. A. Smith, or your tribing, Mr. Johnston, that Johnston, then I have given you proof, and you know that I do all I claim. And I want you to give me credit for what I prove. There's nothing surer than the word of an honest man, and when such men as these admit that I have cured them you know that I can cure.
