President's Missing Overcoat Restored

WASHINGTON, Dec. 11.—President Coolidge's overcoat, left behind in Chicago, has reached here. It followed his special train as the result of the quick action of Richard Jarvis, chief of White House Secret Service men, and the railroad and hotel officials.

On finding that the President's coat had not been placed on the special train, Mr. Jarvis wired the head of the Hotel Sherman to see whether it had been left in the room occupied by the President. The coat was found there and was delivered to the White House by a special Baltimore & Ohio Railroad messenger.

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, O. K. Johnson, 246 Chag street, W. Montreal, is offering to send a lamp on 10 day's FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

KRIBS ADDRESSES LOCAL ENGINEERS

Repeats Paper on "Calculation of Short Transmission Lines"

Gordon Kribbs, M.E.I.C., electrical engineer with the New Brunswick Electric Power Commission, gave an interesting and comprehensive address before the local branch of the Engineering Institute of Canada last night in the N. B. Telephone company building "The Calculation of Short Transmission Lines." It was the same paper which received a great deal of attention at the Professional Engineers' meeting in Halifax in October.

Mr. Kribbs started with the fundamentals of electrical knowledge, defining the terms and explaining units used. He linked his examples up step by step to the elementary transmission lines and then to short distance lines with voltage less than 36,000. He explained reasons for loss of voltage in transmission, and told how to find the size of wire necessary for any special work.

A vote of thanks was tendered Mr. Kribbs on motion of Geoffrey Stead, M.E.I.C., and F. P. Vaughan, M.E.I.C.

RESOLUTION OF REGRET.

The branch passed a resolution of condolence in the death of R. H. Cushing, M.E.I.C., one of the oldest members of the branch. He had belonged since 1888 to the Canadian Society of Civil Engineers, to which the Engineering Institute had been amalgamated.

Abraham Goodman, who appeared as counsel for the brothers, who reside in Brooklyn, reminded the court that there are eight indictments pending against his clients and said that the brothers would plead guilty to one of the counts provided that the sentence to be imposed would cover all the counts. "Oh, I Cannot Eat. There is Not a Thing that I Want"

"BUT you will never gain strength if you do not eat."
"No, I suppose not."
"What did the Doctor say?"
"He blames it all on my nerves; says my nervous system is exhausted and that I have nervous indigestion."
"Does he think you will soon be better?"
"No; he says I will have to be patient and let my digestive system rest and my nerves gradually regain vigor."
"Well, I know what I would do."
"What is that?"
"I would start in right now with Dr. Chase's Nerve Food. I have been nursing on so many cases just like yours and have seen so many restored by using Dr. Chase's Nerve Food that I am sure it is just what you need to build up your nerves and make you well."

"I have heard lots of my friends tell about using Dr. Chase's Nerve Food when they get run down, but it never occurred to me to try it myself."
"Well, I certainly would try it if I were you. I have never seen such results as a treatment for the nerves from any other medicine."
"If you will go around to the drug store and get me a box I will start in right now. Goodness knows, I need something to build up the nervous system so that I can eat and sleep and get some strength."
"All right, I will do that, and I know you will thank me for suggesting it."
