am just a plain, old sallorman
Who loves the sea and sky,
The Constitution is my boat,
And proud of her am I.
But I saw the British yacht come in
With all her cannas set,
And on a sweeter craft these eyes
Have never lighted yet.

BULLET WOUNDS IN WAR.

point in the campaign but, as died. This was owing to the prompt application of first aid dressing. There were aims in the campaign relatively few amputations. In the experience of one doctor, out of \$,000 cases, there were only 20 amputations. A valuable portion of the British medical report is that furnished by Dr. G. Sterling Ryerson, of Toronto. Dr. Ryerson relates that he saw at Kimberley 147 wounded Boers in a roller rink, which had been converted into a temporary hospital. They were of all ages, from 15 to 65, and had been wounderd at Paardeberg. In many cases the wounds had been undressed for from 15 to 17 days, yet the recoveries were excellent. The doctor tells of one man who had been shot through the elbow joint, and whose only treatment had been the universal Boer remedy, tobacco juice. The arm was enormously swollen, and almost etysipalatous in appearance. A civil surgeon, however, took the case in hand, with modern methods, with the result that the man made an excellent recovery, retaining even the power to move his arm at the joint Another man, shot zour inches below the heart, recovered, and a medical officer shot through the stomach resumed his wonted health. The recoveries were the modern treatment which has robbed the bullet of its ter-

TERMS ARE TOO EXACTING.

Ottawa Firm Alleges Persecution from Inspectors and Labor Men—Decide to Have Goods Made in Montreal. Inspectors and Labor Men-Decide to Have Goods Made in Montreal.

OTTAWA, Sept. 12.—A curious outcome of factory legislation is announced. Some four hundred and fifty families in Hull and Ottawa, principally the former, will, it is said, be thrown out of employment as the result of a decision by an Ottawa clothing concern to hereafter have its ready made clothing manufactured outside of these cities. The firm has just entered into a large contract with a Montscal house to do the work which here-tofore has farmished a means of subsistence to, and enriched the larder of many families here and in Hull, and the \$75,000 annually paid out in wages for the above purpose will go to Montreal. The decision of the company has been occasioned, the firm states, by the actions of government inspectors and labor representatives, who have been exacting such terms and conditions fifat it amounts aimost for persecution. The firm has heretofore supplied the cloth, cut and trimmed, to its, operatives in hull and Ottawa, who have been promptly paid. There have been three pay days each week, Mondays, Wednesdays and Fridays, and on each day about \$500 in wages has been distributed. Under the new order of things this will stop, and the serious precuminary loss to which the families will be put can readily be conceived. The women who have been employed include many widows and wives of those whose husbands work in the shantles, and they have been able to clothe themselves and families with the weekly remuneration earned by their sewing at home.

The Harvard (Ill.), Independent defines an editor in a way that is calculated to put the Century Dictionary to the blush. An editor, it says, "is one who reads newspapers, selects miscellany, writes articles on all subjects, sets type, reads proof, works the press, folds, packs, and directs papers, and sometimes carries them, prints tobs.

WORD-FORMING

Thirty Compensation Prizes, each consisting of a hand me picture of the King.

to do is to find as many words as you can, using all or any of the it which are found in the words "KING EDWARD," according to the fo

Ing conditions:

No letter can be used twice in the same word except the letter "D," which appears twice in the words "King Edward."

No proper names or compound words allowed.

An affix or a prefix is not a word.

Competitiors may use any standard dictionary, the name of which should be stated at the end of the list.

Below will be found a coupon divided into twelve spaces. All the words sent in by competitors must be written on these coupons taken from the STAR, one word only in each space. Further coupons will appear in the Star every night until the close of the contest.

The first prize of \$15 will be awarded to the competitor who sends in the greatest number of words formed according to the rules of the contest as stated above. The second and third prizes will be awarded the competitors sending in the two next largest lists, and a picture of King Edward will be awarded as a compensation prize to the thirty competitors sending in the thirty next largest lists. The decision of the competition editor must be considered final.

Intending competitors should note the rules governing the contest, and observe them carefully. Lists not formed strictly according to the condi-

NATURAL HISTORY SOCIETY FIELD MEETING.

The second meeting, the study of nature in the field, was held at the Park on Saturday affernoon, and was well attended by members of the society. The weather was all that could have been wished. The party assembled at the bridge near the dam, and passing around the eastern end of the lake, examining the lamestrone rock, and graphite bearing plants by the way, ascended the slope at the back to the top of the quartiste hill behind the lake, whence an extensive view was had of the Marsh, the Bay of Fundy, the suburbs of the city, and the broken country in the direction of the Narrows. On the western side of this hill an overhanging cliff gives shelter from showers, and has been improved by the Park commissioners by the erection of cyclopean benches. From here the party proceeded to Rockwood bog, where one of the laaders recounted the history of this bog, and the changes through which it had passed to reach its present condition. On their return, the members went to the house of Dr. Matthew, where the collections made were examined and prizes were were awarded to the collectors. Miss E. McBeath captured the first prize in botany, with Miss Morrow and Miss Mary Gilbrigit a close second and third. Miss E. Difek-

Morrow and Miss Mary Glibrigt a close second and third. Miss E. Dicker took first prize in geology and mineralogy, and Master Smith also was awarded a prize for his collection of rocks and minerals.

HORSE DENTISTRY.

Remarkable Operation Without the Administration of Ether.

Remarkable Operation Without the Administration of Bither.

NEW YORK, Sept. 10.—The operation of filling eleven teeth of a horse with gold and silver was finished yesterday by Dr. Theodore M. Henderson of the New York Veterinary Hospital.

No. 117 West Twenty-fifth street.

The subject was Bahker Jefferson Seligman's sorrel mare Anna, the favorite saddle horse of Mrs. Seligman. That the operation, which was performed in the stable 'at Long Branch, was wholly successful is shown by the eating of the horse, which has had littled of the control of the horse, which has had littled of the weeks, because of the had teeth. The mare ate with great relish, after leaving the dentist's hands.

Dr. Henderson took a number of large drills, several other instruments and several hammers, with a quantity of gold and silver to Long Branch and began the operation of cleaning out the cavities and filling them. The mare was not given ether or other anaestheting to cause her to be entirely oversome, but, instead, Dr. Henderson says he administered cocaine. To do this, he said, obviated any roping of the mare other than a halter. Her legs were not tied, and she stood during the entire operation.

"She seemed more to enjoy it than disliks it," said Dr. Henderson. He put if he proportionate quantity of silver in the other nine teeth.

KIND HEARTED NURSE.
