- On Circuits.*—The whole Conference.
- Adjourned.

Met again at 2 o'clock at the meeting house.

Heard report of Committee on Sabbath Schools, which was adopted.

REPORT.

Your Committee on Sabbath Schools feel particularly desirous to lay before this Conference a Correct report of the present condition of, and interest taken in, the cause of Sabbath Schools amongst us, as a Denomination,—but owing to the limited information which is before us, and the extent of country over which our schools are planted, we can only judge of the unvisited parts by the observation of places and schools visited, and such other information as has indirectly come to hand. We are pleased to say, however, that every year develops a growing interest in, and an increased attachment to this institution, and our convictions are that, under God we owe to our Sabbath Schools that high moral tone, which characterises the great mass of our children, from those who have never come under this influence, and we cannot, for a moment, think it advisable to dispense with Sabbath School instructions, though it may call, as it does, in reality, for pecuniary sacrifice—and without which a sufficient interest cannot be kept up in the minds of the children. Libraries must be replenished—and we would also recommend the importance of having proper hymns and music books, that the children, while young, may become acquainted with the sacred songs now in use. We would further say that we believe the interests of Christ's Kingdom to be indivisible—and whatever has a tendency to store the mind with Bible Truth, has an equal tendency to promote spirituality amongst us as a people. We are also inclined to think that no system of education is better calculated to establish the minds of the rising generation in the doctrines of the cross, than the instructions imparted by the faithful Sabbath School instructor; and we do believe that they occupy positions in the world of an enviable nature, in erecting barriers to stay the tide, and hinder the progress of the spirit of unbelief; and as a Denomination upon which a kind Providence is smiling, we ought to do all that in us lies, to increase the power of an institution which is so well calculated to turn the youthful mind in those channels, and in those streams which flow into that river that shall make glad the city of our God.

We would also beg leave to call the attention of the Superintendents
