Editor's Talk

COME people imagine that national sentiment and policy in this country begins at Charlottetown and ends at the west side of Vancouver Island; or if need be the other way on.

A glance at the contents of this issue of the "Canadian Courier" is enough to prove that Little-Canadianism is now popularly impossible. Our Pacific Coast line exposes us com-mercially to Japan, China, and India, and gives us practical concern with the political and naval events in both Australia and New Zealand. For three thousand miles we are contiguous to the United States, and therefore interested in the affairs of Mexico. From East to West we are directly affected by whatever action is taken in the Imperial Parliament concerning the overseas dominions; and not less, sometimes very much more, by what our Canadian Parliament may do about the Empire.

Three pages of this issue demonstrate how intimately we are tied up with these world-wide problems. Now and then during the hot weather we discover a man who buys a silk tent and fishing tackle to plunge into a land of rivers and forget that he is a citizen of anywhere. But even in the woods he is likely to get a newspaper or a letter or a telegram reminding him that to be an intelligent, civilized citizen nowadays he can't afford to lose track of the fact-that the annihilation of space by modern inventions makes the individual man a much more complex unit than he used to be fifteen or twenty years ago.

NO. 7

There is no comparison between the KALAMAZOO and any other binder. It has overcome practically every objection that has ever been offered against the loose leaf idea.

Its capacity is greater than any other, and it requires no padding with unnecessary sheets. The writing surface is firm and flat.

Sheets are easily inserted, removed, and kept in perfect alignment.

There are no exposed metal parts to injure the desk.

Don't remain dissatisfied with loose leaf systems. Let us show you what the KALA. MAZOO binder will do.
