### 25 Percherons, also French Coachers, Hackney and Clyde Stallions

Have just arrived, Aug. 16, 1905, from Great Britain and France with our new importation of high-class stallions, many of them prizewinners in their native lands, bred by the best breeders. The Percherons are large blocky fellows, 3 to 6 years old, descendants of such noted champions as Brilliant, Besique and Boninus. Blacks and dark dapple greys, weighing from 1,600 to 2,100 lbs., with the right kind of legs and feet, and can go like trotters. We personally selected every horse ourselves, using extraordinary caution to select nothing but good sound serviceable horses that will do our customers and the country good. The French Coachers, Hackneys and Clydes are also of the best breeding, some of them prizewinners in England, Ireland and Paris. We will sell you a better stallion for less money than any other importers in America, with a guarantee as good as gold. Intending purchasers should visit our stables before buying elsewhere. Inspect our stock and get our prices. Terms made to suit purchasers.

Hamilton & Hawthorne, Simcoe, Ont. 82 miles S.W. of Toronto, on G.T.R. & Wabash

### THE VERY BEST SHIRE STALLIONS

and High-class Pedigree Colts

### QUESTIONS AND ANSWERS. Veterinary.

#### UNTHRIFTY HEIFER.

Yearling heifer does not eat well, and is quite thin. She drinks little; she will not eat her meal half of the time. I feed mixed hay and oats, bran middlings and corn meal, with stock food. W. H. B.

Ans.—Purge her with 1-lb. Epsom salts and 1 oz. ginger. Take equal parts, sulphate of iron, gentian, ginger, nuxvomica, and bicarbonate of soda; mix, and give a heaped tablespoonful three times daily in a pint of cold water as a drench. Feed in small quantities and often, and gradually increase the amount as her appetite improves. V.

#### WEAK IN STIFLES.

Three-year-old colt is weak in his stifles. J. S. T.

Ans.—Take 1 1/2 drams each, biniodide of mercury and cantharides, and mix with 2 ozs. vaseline. Clip the hair off front and inside of joints, and rub the blister well in. Tie so that he cannot bite the parts. In 24 hours rub well again with the blister, and in 24 hours longer wash off and apply sweet oil. Let him loose in a well-bedded box stall now; keep as quiet as possible, and apply sweet oil every day. Blister once every month in this way for four or five times. V.

#### MISCELLANEOUS.

1. Six-year-old does not lift fore feet right. Sometimes she stubs her toes and stumbles; at other times she will lift them very high with a springy gait.

2. Yearling colt walks on his heels. The toes do not touch the floor when he stands.

3. Give recipe for drying a cow. C. H. B.

Ans.—1. This is a nervous affection that affects the muscles in different ways at different times, and it is not probable that treatment will do much good. Blister the muscles in front of the forearm, and give her 2 drams bromide of potash twice daily. Blister once every month.

2. All that can be done for this is to keep the heels rasped well down. It is possible he may improve when he gets on pasture. Special appliances might be attached to the limb, but this would cost a great deal, as they would have to be made especially to fit by a mechanic who understands such things.

3. Give a purgative of 2 lbs. Epsom salts and 2 ozs. ginger. Feed on dry food only, and draw a little milk when the udder becomes filled. V.

#### LUMPS ON CATTLE'S LEGS.

I have had a number of cattle at different times with lumps from the size of the end of a man's finger to that of a hen's egg on their legs, usually below the knees, but occasionally above.

1. What causes these lumps?  
2. Are they contagious or hereditary?  
3. Are all lumps on cattle's legs of the same nature?  
4. Do they injure the beef or milk?

E. O. H.

Ans.—1. They are caused in different ways. They may be caused by direct injury, but are usually due to an impure condition of the blood, and are often tubercular. In many cases they contain pus; in others, the characteristic cheesy matter of tuberculosis, and in most cases are very hard or impossible to cure. Where pus is present the lumps should be lanced and the cavities flushed out with an antiseptic daily until healed, and the patient should be given about 20 to 30 drops carbolic acid three times daily.

2. The predisposition appears to be hereditary in many cases. In others contagion may exist.

3. No.

4. If the trouble is confined to the legs, the beef will not be affected, but if other organs are affected it is different. I do not consider the milk of an animal with a chronic eruptive disease is healthful. V.

Attention is called to the advertisement of registered Holsteins by Howard Wilson, of Russell, Ont. The three-year-old bull is a grandson of Sarcastic Lad, the St. Louis World's Fair champion, and his dam is in Advanced Registry.
