**Look This Square in the Face**

LET a man ask you six months after you buy an IHC outfit, "Why are you using a cream separator? Is it making money for you?" and the question will sound as sensible to you as though he had asked why you used a binder.

The outfit pictured above will give you more cream from your milk, saving from \$5 to \$15 per year for each cow you milk; separator skim milk, sweet, warm, and wholesome, will give you healthier, fatter pigs and calves, and this again means more milk and increased soil fertility. Many more things an

will do for you. Then the one-horse power back-geared IHC engine will be your most efficient helper. It is mounted on a portable truck, is economical, steady and reliable. It will pump water, run a washing machine, churn, sausage grinder, grindstone, and do any other farm work to which its power can be applied. Each style has four sizes.

See the local agents who handle these machines, and have them demonstrate the working to you, show you the close skimming qualities, and efficiency, and go over the mechanical features with you. They will give you catalogues and full information.
