

VEGETABLES ON CEMENT

We have had cement floors in our cellars for two years. Have had old boards laid on top to keep potatoes and vegetables off cement. Some members of the family wish the old boards removed. Would it be advisable, or would the cement taste the potatoes and vegetables in any way?—C. M. T.

Ans.—The cement floor will not flavor the vegetables. The only question is whether it is dry enough to ensure against decay. If the floor is a dry one, laid on a well-drained foundation, it will be all right. Too dry a storage is not desirable.

SIX ESSENTIALS IN WINTER EGG PRODUCTION

1. Early hatched pullets or yearling hens. Early pullets are the most prolific layers. See that the pullets selected for the laying pens come from hens that have a creditable record in winter performance. Like begets like, and pullets from heavy winter layers will lay better in winter than stock indiscriminately selected.

2. Dry, light, well ventilated houses. A house with lots of windows and well ventilated is always dry. As good a way as any to ventilate a poultry house is to use cotton or muslin in one or two of the windows instead of glass. If a straw loft can be put in so much the better. Let in the sunlight and fresh air.

3. An egg-producing ration. Give the hens whole grain, mashes, green feed and meat. Whole grain, wheat, oats or barley is the backbone of the ration, mashes of ground oats with the hulls sifted out, shorts and bran give variety, and are easily digested; green food keeps the blood cool and gives bulk to the ration; meat supplies protein from which the albuminous portion of the egg is made. Get for the gizzard and oyster shell or lime in some form for egg shells. Supply what else is required to form the egg.

4. Water. Hens will get along without water getting what moisture they need from eating snow, but they do better where a supply of clean water is available most of the time; if possible, all the time.

5. Exercise. Make the hens work for their living. Fat, lazy birds are never record winter layers. Exercise keeps hens warm, in good condition and contented. It is most easily provided for by feeding whole grain in a litter. Short straw, or chaff make the best litter. Have 8 or 10 inches of it on the floor, and make the birds dig their living out of it. Change the litter frequently.

6. Cleanliness. Have a dropping board beneath the roosts, and scrape it clean every day. Have road dust or dry ashes or sand in convenient boxes for the birds to take dust baths in. If dust baths are provided, there is little danger of a flock becoming infested with lice. Occasionally, smear the crevices about the roosts with kerosene and before winter sets in well clean out, whitewash and fumigate the house.

FUMIGATING

Every fall, if not oftener, the poultry building should be thoroughly fumigated, not only to destroy lice and mites but to kill disease germs which may lurk in the cracks between boards and in the dust that collects on the timbers. The easiest method is to use the sulphur candles made for the purpose, and sold by dealers in poultry supplies. If these cannot be obtained easily, flowers of sulphur, which may

It's easy to grow plants in a Sunshine-heated home

Pure, Warm Sunshine Air

PEOPLE living in homes heated with ordinary furnaces often claim they cannot grow plants with any degree of success. This is due to the fact that ordinary furnaces are not provided with an Automatic Gas Damper. There is nothing to prevent coal-gas, which is deadly to plant life, being forced up through the registers.

Now, when the gas in the combustion chamber of the Sunshine reaches a certain pressure it sways open the Automatic Gas Damper and passes up the chimney, consequently there is no chance for it to escape through the registers. Instead, the air that passes through the registers is pure, warm, Sunshine air, laden with the proper degree of moisture from the water-pan. It's the kind of air that makes plants thrive and is good to breathe into your own lungs.

If you want to guard your home (and who doesn't?) against evil-smelling, deadly coal gas order our agent to install the Sunshine furnace (guaranteed) in your cellar.

Could we afford to buy and give away hundreds of thousands of 50-cent bottles of Psychine (pronounced Si-keen) if we did not know from a third of a century's experience that it was the greatest vitality-builder of the age?

You know what it would mean to us were Psychine a preparation without a definite, beneficial action.

After the first bottle which we would buy, no more would be purchased.

And we would go out of business. But we're not going out of business, and our confidence that we're not is based upon our third of a century's experience with Psychine.

Ten years after Confederation we commenced compounding Psychine. Since that time, we have sold many millions of bottles.

We have cured many hundreds of thousands of virulent and oftentimes fatal cases of diseases.

We have in our files many hundreds of thousands of unsolicited testimonials.

And we have grown from a small beginning to be one of the largest proprietary manufacturers in this country.

Here then is proof that we have in Psychine a preparation with abundant and demonstrated effectiveness, more so than any other preparation we, or anyone else, ever heard of.

Here then is the reason of our unalterable confidence in Psychine, that it is in fact the greatest preparation of its kind in the world.

Here then is why we have inaugurated a policy of actually buying hundreds of thousands of bottles of Psychine to give to those who should use.

To those who are blindly groping in the dark for relief from their misery, who may perhaps be using wrong methods to recover their health and their strength.

LAGRIPPE.

The greatest and most effective agents for the bodily health are the white corpuscles, phagocytes.

These white corpuscles eat any germ of disease that gains an entrance to the body, when they're in large enough numbers and sufficiently strong.

When they're not sufficiently strong, the disease germs devour them and disease holds the body.

For centuries almost, herbs, nature's own remedies, have been the most efficient foe to disease.

We have not known very definitely just how.

But now science tells us that certain of these herbs increase the number of the white corpuscles and their strength.

These certain herbs are incorporated in Psychine.

We go to the ends of the earth for these herbs—to Arabia, to South America, to China and to Japan.

They are compounded in the most costly chemical appliances in this country.

And the result is Psychine—for a third of a century the most effective vitality-builder the world has known.

The one preparation that has cured many thousands of the following diseases:

La Grippe	Bronchial Coughs
Bronchitis	Weak Lungs
Hemorrhages	Weak Voice
Sore Throat	Spring Weakness
Anaemia	Early Decline
Female Weakness	Catarrhal Affections
Indigestion	Catarrh of Stomach
Poor Appetite	Night Sweats
Chills and Fevers	Obstinate Coughs
Sleeplessness and	Laryngitis and
Nervous Troubles	Dyspepsia
After-effects of Pleurisy, Pneumonia and	
La Grippe	

Now we don't ask you to take our word for the tremendously beneficial effect of Psychine. Fill out the coupon below, mail it to us and we'll give your druggist an order (for which we pay him the regular retail price) for a 50-cent bottle of Psychine to be given you free of cost.

We will undoubtedly buy and distribute in this manner hundreds of thousands of these 50-cent bottles of Psychine.

And we do that to show our entire confidence in this wonderful preparation.

A confidence that has been based on our 30 years' experience with this splendid preparation, with a full knowledge of the hundreds of thousands of cures it has made.
