In consequence of the immense rask of sinters of Executive Committee have decided on keeper OPEN the EXHIBITION on MONDAY, ITEDAY, and WEDNESDAY next, when it will be POSITIVELY CLOSED on WEDNES-

JOHN LEEMING, WILLIAM

Montreal, Oct. 21, 1850.

A HISTORY OF THE LATE PROVINCE OF LOWER CANABA, PARLIAMENTARY AND POLITICAL

ROBERT CHRISTIP, Esq., M.P.P. for George.
Quebec: Thomas Carv, 1850.

In the preface to this, the third volume of his most vuluable history, the author tells us, he had originally latended that the work should be comprised in three volumes, but that, since the publication of the second volume, some interesting original papers, relating to the history of Lower.

Canada, have been placed in his hands, in consequence of which he has altered his intention, and Canada, have been placed in his hands, in come quence of which he has altered his intention, and will extend the work to four volumes. Every one who is interested in the his ory of Lawer Canada, will be glad to hear of Mr. Christies determination, for, since the destruction of somany valuable documents and works elucidating the earlier history of this Province, contained in Mr. Fartbault's collection, totally consumed on the contained in Mr. Parthault's collection, totally consumed on the never-to-be-forgotten night of the 25th of April, 1849, every fregment that can be brought to gether assumes a ten-fold value.

The volume before us, narrates succinctly the

events that occurred in Lower Canada to the ex-piration of the Provincial Parliament in 1834, embracing part of the Government of Lord Dalhousie, that of Sir James Kempt, and part of that

of Lord Aylmen to the last and a state of the last week to the last acknowledgment's prefixed to this volume. Since the publication of the second volume, a question was raised, by the Monreal Courier, we believe, in the first instance, as to how for the expedition to Platsburgh, in 1814, under Sir George Prevent, was to be attributed to that officer's own will in the matter, or to instructions received by him from England, We think that Mr. Christie has fully proved that the Governor of Carada acted under instruction, and has, thus far, vindicated his memory. Whether the expedition itself was conducted on truly scientiste military princi-ples, in quite another matter; we do not think it was, but this is not the place for a discussion of the question. Sir George Prevent's policy, during the whole of the last American war, was the work, assume to write among property ducted strictly on the defensive—such being not called; he simply elaims to give a sketch of the only in accordance with his instructions from called; he simply elaims to give a sketch of the colly in accordance with his instructions from called; he simply elaims to give a sketch of the called; he called the ca England, out also emores on any processing the content of heatilities, the necessary means in Canada for as offensive warfare. But a terwards, when the upfire of the Canadian people was thoroughly roused by Brock's success at Detroit, the capture of General Hill, success at Detroit, the capture of General Hill, such as unch as impartial nearation or success at Detroit, the capture of General Hill, such as content in the most success at Detroit, the capture of General Hill, such as content in the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of General Hill, such as the most success at Detroit, the capture of the c DeSa'aberry the British Government felt that Cannada will safe from offensive operations by the Americans, and the glorious termination of the Peninsular compaign leaving a fine army at their disposal, it was considered by the English Afiniaters that offensive operatio's might be undertaken. The event proved that it have seen.

At eight o'clock, the time appointed for the At eight o'clock, the time appointed for the was a very unfortunate idea. We have, however, but very little space for detail; it accepts that very little space for detail; it accepts though, from a despatch of the 3rd of June, 1814, from Earl Bathurst to Sir George Prevost, that that General was if possible, to "desfroy Sackeit's Harbor and the naval establishments on Lake Eric and Lake Champlain." He was cautioused, however, not to advance so far into the American territory as to endunger the safety of any portion of the army. But the destruction of the establishment on Lake Champlain could not be accomplished without a forward movement into the American territory and Sir George Prevost, therefore, seems to us to have had no other alternative, if he wished to corry out his instructions. Mr. Christic distinctly states that Captain Floor and Mr. A. W. Cochran, who filted the poste of Military and Civil Secret by to Sir George Prevost during the expedition, have frequently, in his hearing, attributed the unfoward expedition to orders from Englaird, and he publishes a private despatch from Sir Georga to Earl Bathurst, after the retreat of the army, in which he explains the causes of the failure of the expedition, and hitmutes that in former despatchs he had a second of the former despatchs he had a second of the state in former despatchs he had a second of the second of t Bathurs, after the retreat of the army, in which he explains the causes of the failure of the expedition, and hitimates that in former despatches he had pressed on the Secretary's attention the fact that no affracts operations could be carried out the energy a territory without efficient name upport. How shamefully part of the navel facility port. How shamefully part of the navel facility behaved, we know from the testimony of our gallant enemy, Macdonoush, who distinctly stated for the commissioners of the linear distribution of the facility of the Americans, must have been bestier, and we know size that Rayes and McGee, both Lieutenants is the Rayes and the spinish know your estimants on the subject of the married fight, dured diverse to the first, present the strength of the services of the Navy Lieutenants is the Rayes and the spinish know your estimants on the subject is the public know your estimants on the subject is the public know your estimants on the subject is the public know your estimants on the subject is the public know your estimants on the subject is the subject is

part of the Democratic party, and the counter ac-dresses of the Royalists; the commencement of the Ridens Cinns; the discontinuates of free grants of public land; the dismissals of Magis-trates and Militia Officers, for taking part with the Democratic majority of the House of Ameri-bly; the conclinatory policy of S.r James Kempt; the approval of Mr. Papineau as Speaker; expu-sion of Mr. Christie, the author of this work, from the House of Assembly in five increasive Parlia-ments; the first meeting of the Pive Counties; the commencement of the Chambly Caust; revival of the project for the union of the Canada Mr. Viger appointed Agent of the Democrata England by Bill; Jesuits' estates devoted excl aively to education; Duverney and Tracey sent to prison for breach of privilege, by the Engistative Council; the election riot and fatal, fire of the 15th Regiment at Montreal, and protracted inquity into the affair by the House of Assembly; one PROM THE COMMENCEMENT TO THE CLOSE into the affair by the anomal of some property of the experience of the experience of the experience of the experience of the existing constitutions dismined of Attorney General (now Chief tutions dismissal of Attorney General (now Chie

> than to give his own. Not the least interesting part of the book, is the account of the author's own persecution by the demagogues of the Lower Canada Parliament—it is not every men that can say, he has been five times elected by his constituents, and five times expelled by a Parliament, of which it is not too much to say, that if it had had the power, as it had the will, it would have been fifty times so tyrannical as any such Assembly the world ever law. As it was, its raving and storming were but like the tempest in a certain utenail of ignomations offers, which is quieted by pitching it out of a window; and Mr. Christie in his arm-chair may smile when he thinks that he has lived long enough to live down calumny, and see his malignant enemies scattered like chaff, witle he sits triemphantly, no man having a chance in opposing him, for the same constituency which with samirable consistency and contage; five times returned their persecuted member. The only user of those found in the major ty against Mr. Christie, on these successive expul sions, that now exists as a public man, is Mr Louis Lafontaine-and he, only last year, narrow

ly escaped being hange I on a lamp post ! The author of the History of Lower Canada does not, if we rightly secollect the prospectus of

Montreal, 19th October, 1850.

CANADIAN AFFAIRS. OUR OWN CORR

red at the wharves, in this city, this fall year, to the same date, 100,000 delivered. The crop is estimated to

been delivered. The crop is estimated to be greater than deat year; and it would seem that the farmers are holding their grain from market, in the hope of getting a better price.

When the arrangement between the Through Ethe and Mr. Bethune's Company expires, on the Sth Negember, the proprietors of the farmer for tend to put on the Passport as an opposition hear to Mr. Bethune's lit will, however, be too lists in the season to do more than make a show of opposition. Mr. Bethune is in treaty with Capt. Dick's share-sone-half—of the Chief Vastice Robinson, for £7,000. Captain Dick is to build himself not to run any load so the lake is opposition for ten years. The arrangement will most likely be made, for Cuptain Dick, fike every other sensible man, must see the great difficulty of contending with the Through Line and Mr. Bethune's combined; the company that owns the latter, consisting of 80 persons, with an acapte capital. For the last few years, the schooners engaged in the lake trade have been decreasing in numbers; and, in a few more years, it becames as if the Polligan, in the street. The grain decision with this, and walked with him, ten minutes before the him, ten minutes before the him, ten minutes the found that him the floud Chonan lying in the street. The girl, Mary McCormank, and the street. The suit, Mary McCormank, and the street. The suit, Mary McCormank, and the even decreased with him, ten minutes to fit the street. The found thin him the street. The floud Chonan lying in the street. The suit, Mary McCormank, and the even decreased with that he had aften the cound of the treet of the transmit to the house of the mother for the person who had look the that minute, who had seen decreased that menting at Long's that placed it beyond all doubt that Through Line and Mr. Bethunes a though the evidence of Mustray placed that part of the evidence of Mustray placed that part of the evidence beyond all doubt, the street of the evidence of Mustray placed that part of the evidence of Mustray placed that par the lake trade have been decreasing in numbers; and, in a few more years, it neems as if the Polisungs would drive them completely off the lake. The secret of the success of the steam craft is the immense average in time that results from their rapid sailing. A Pollicon will make twenty to twenty two trips in a season from the head of the lake to Montreal, while a schooner would not make more than six or seven. Last senson, the Ottown carried dottin 33,000 barrels of flour. The schooners can hardly make a paying business of it at less than 1e. 6d. per barrel from the head of Lake Ontario to Montreal, while the steam eraft end Contario to Montreal that the prisoner pushes first, and he is pushed back by the decreased. Mote would have to consider the purpose of the contario to the contario

been published respecting the treaty that has been boor read over this part of the evicetic again and stated that the Jury would have to conside those words well. He then read over the evident of Hamel again, as again that of Ryan. Pierre Richard heard the report of a gun so ver concluded with the Indians, but the Government organ has not been able to give the slightest in-Pierre Richard heard the report of a gun so very near that he thought it was aimed at him. Trey would remember that the body had been found near the prisoner's house, and his immediate neighbor, Munro, had positively savon that no gun had been discharged from his house that night. The deceased's body had been found lying on the ground immediately opposite prisoner's door. They would remember that when search had been make in prisoner's house that a gun had been found in a closet which bote evidence of having been recently discharged. All these facts would go a great way, to fasten upon the prisoner the discharge of the gun. All the facts that he had narrated were corroborated by Murray, who also gave direct tes-

formation on the subject.

The Globe is laboring hard to whip in the unru'y Ministerial pack, As things go at present, the total disruption of the Ministerial party is evident and this the Globe is trying hard to avert. The great complaint of that journal is, that the Ministry have no policy before the country—that their supporters do not know what measures they intend to introduce, and that the Press is in utter gnorance of all their movements. This the organ calls a want of tact, and proposes, as a re-medy, the formation of Reform Committees in every County, which shall be committed to the policy of the Government; and that no member of the party shall be at liberty to express inde pendent opinions on the policy of the Government That is what the proposal amounts to. The ef-fect of this scheme would be to make the Globe the organ on all those Legislative questions on which it has now no information whatever, and perhaps to prevent some of the complaints that ow have from the Ministerial ranks. It is, in act, a clumsy attempt to surround the Ministry with a factitious eclat, and to curb the free expression of opinion. But it will require a good deal of maxing to persuade men of independent views and feelings to enter into political engagement hat would compel them to sacrifice their convicions at the shrine of party. The Globe does not comprehend that it is the advance of opinion that splitting up the Government party. It is a total missiprehepsion of the actual political con-dition of Upper Canada, to suppose that the old see-saw game of Tory and Radical is to be played forever. The bulk of the people will, not allow hemselves to be thrust into the rank of either the old decaying parties. A new state of things is dawning. There exists a desire for elective institutions, which neither of the old parties are willing to grant. They are both alike behind the times. Neither of them can control that popular

him that would go to show the contrary. It has been attempted on the part of the prisoner to shake this witness's evidence, and it was of great—of the last importance for him that he should do so. The Jary would compare his evidence with that lot other witnesses, and if they found slight civer-generes they would enquire it, they could be actiounted for. It was his duty to tell t emithat in a Court of Justice it was impossible to find evidence of several witnesses entirely concurrent in all its details. In the present case its, Nelson mentioned the hour of 8 o'clock while all the others ten or twelve. According to the habis of thought of different men, some would speak more certainly than others on a particular point. Minute details of difference may be struck out, and leading points out y considered. Some men might

mistitutions, which neither of the old parties are willing to grant. They are both nike beined the times. Nether of them can control that perially successfully and the sentences of the princer of the princer of the developed to the sentences of both, could not be induced to give either a cordinal support. The myara gower, on the Ministerial party is gone. The tinta of labor Republicaniam has dissolved it. If any jower could thrust the entire people of Upper Could make the sentences of the Ministerial party is gone. The tinta of labor into the zanks of the two okts on an assistant the zanks of the two okts on an assistant the zanks of the two okts on an assistant the zanks of the two okts on an assistant the zanks of the two okts on an assistant the zanks of the two okts on the control the zanks of th
