A few years ago people would not look at you if you were to ask \$10.00 for a Boy's Suit, but I to-day it is different. A boy wants what he wants and he generally gets it. But there are reasons why you should pay a good price for your Boy's clothing. In the first place a boy is a great deal harder on his clothes than a man is and the quality must be in the cloth. In the second place, boy's now-a-days pay more attention to style and they

Then the boy wears his coat out at the elbows. Ours have double elbows. He wears his knickers out at the seat and knees. Ours are reinforced there too. Wherever experience has shown that the boy will wear through, we have put two ply of goods and made the stitching double too.

- The coats are longer this year, the lapels are longer and more graceful and they make the boys look more like little men.
