THE UNION ADVOCATE, WEDNESDAY, APRIL 25, 1883.

St. John, the capacity of the old cotton mill has been very materially increased. There-fore I say, not to speak of the bolt and nut works, and the amount of work done by the certainly increasing the number of its manu-facturing industries. In Nova Scotia, a new cotton mill is in progress at Windsor, also one at Halifax, and a large sugar refinery;

and to-day, in glancing over the paper. I saw an advertisement calling for tenders for the an advertisement calling for tenders for the erection of a new sugar refinery in Dart-mouth. The output of coal, I may add. has also very largely increased in Nova Scotia through the operation of the National Policy. Now, Sir, the general effects which have fol-lowed the National Policy are these: our people are better employed, they get better wages, they are kept at home. Instead of going to the United States, they find employ-ment at their own doors. The farmers are getting better prices for their products than they would get if this policy were not in ex-istence of the products than an advertisen egain getting better prices for their products than they would get if this policy were not in ex-istence. The manufacturer has the home market for himself. It is not necessary for us to go abroad to borrow money. Notwith-standing the statements from the other side, I assert that the goods our manufacturers uce under the operation of this Tariff, produce under the operation of this farm, are given to the consumer just as cheaply as they could have been given under a 20 per cent. Tariff-a similar class of goods import-ed from the other side of the water. We get commends instead: as cheap goods, and we get better goods. I assert, as a matter of fact, that the article of assert, as a matter of fact, that the article of tweeds, referred to by hon. gentlemen oppo-site, are produced cheaper and better under the operation of this Tariff than they could have been imported under a 20 rer cent. Tariff. It has had the effect to shut out a lot of inferior products of the mills in Man-chester and other English eitles. Take the ordinary kind of tweeds costing 2s. a vard, largely made up of shoddy. Under a 20 per cent. tariff those goods cost. haid down, about 63 cents a yard; I assert, without far, of contradiction, that you can buy a Canadian loved increased. about to centra with a pure a strength whould be protection of basts on each side, tweed for 55 or 60 cts. a yard, a much better article, and giving much better satisfaction, than English tweed Again, the policy of the Government bas given us cheap tes; it has given us free tea. Not only that, but it has conferred on the people of the Maritime Provinces, and more particularly on the has conferred on the people of the Maritime Provinces, and more particularly on the county 1 represent, an inestimable boon in the fishery bounty of \$15:.0.0. I usk you if we were under the regime of the hon gen tiemen opposite, with deficit after deficit, could they aff rd to give that bounty to the fishermen? No, sir. My hon, triends on posite will say that e money was due to the people of the Maritime Provinces, under the award of the Washington Treaty, but it we had deficit after deficit, that \$150,000 would have to be taken to mee the ordinary requirements of the Government I was glad to hear that the attention of the Government I was glad to hear that the attention of the Gov-

glad to hear that the attention of the Gov-ernment has been drawn to the necessity of better trade relations with the people of trade should be increased in the dir ction of the West Indies and Brazil, and also with the continental countries of spain. Fra: ce. Italy and elsewhere, in order that we may become less dependent on the United States for a market. To my mind, the West Indies and South America are the natural markets for the Maritime Provinces. I hope every effort will be made by the Government to develop trade in that a tree for a markets. Sales at stock farm, do., Fees from Luna-tic Asylum, Miscellaneous, Total estimated receipts, Balance per au-ditor's report, 1882, Less — Sundry

develop trade in that direction. In connec-tion with this matter I may mention that there is a feeling in the Maritime Provinces that molasses should be placed on the Free List. It enters targely into everything that we produce, yet it may be necessary to retain the dury new lowing on this matter to the the duty now levied on it in order that we may better be enabled to secure Reciprocity

An act respecting certificates to ceived a very decided snub instead Rev. Henry Crawford, of Prince Edmasters and mates of inland and coasting ships was read a third time.
