COLEY FAILED TO BREAK RECORD.

St. Catharines Oct. 9 .- But for a very heavy track made so by the heavy rains Tom Coley would in all probability have beaten Tom Longboat's five-mile record of 26.26 at Thorold Fair yesterday after-noon, He made the distance in 27.29, less than a minute slower than the Indian's than a minute slower than the Indian's time. The track was so muddy that at places Coley had to go around, which certainly lost him time, and the heavy clay peculiar to the Welland Canal banks cling to his running-shoes in a way that made the going exceedingly difficult/ Children kept blocking the track, and once Coley ran into and knocked over a little girl. Coley was paced by half a dozen local runners, and, while he tired them all out, he finished the five miles quite fresh, notwithstanding the heavy track. Coley was convinced by to-day's trial that he can beat the Indian's five-mile record, and it is quite likely that another trial will be arranged.

COBALT NOTES.

On the Douglas Mine, which consists of six claims, there are three shafts, one 30 feet, one 17 feet and the other 20 feet deep. —Little work of consequence has been done, excepting on one claim, which has made a remarkable showing.

Prof. Miller, Provincial Geologist; Dr Prof. Miller, Provincial Geologist; Dr. Barlow, of the Geological Department; Mining Inspectors Irwin and Murray and Mr. McHugh and other British journalists returned to-day from visting the Gates property in James Township, They give glowing accounts of what they saw. The vein on the property is 12 inches wide, and some time ago a 500-lb, nugget was taken from it. They believe that the Montreal River District will even surpass Cobalt for ore deposits.

A very rich nugget of solid silver, weighing 100 lbs., was taken yesterday from No. 7 shaft at the Kerr Lake property. The vein from which it was taken is a very rich one, and the find was made at a depth of 70 feet.

Another rich strike was made on the Stellar property recently. The find was citadel, I made on the surface, and consists of a Ottawa,

3 to 4-inch calcite vein, which is very rich in native silver. Mr. John Gowans, Kent, president of the Foster Cobalt Mining Company, in a bulletin just issued to the shareholders, says that the directors will issue a statement this month, showing the exact financial condition of the company and the proceeds from the shipments, and containing detailed information regarding the workings of the property. Shipments of ore have been regularly maintained, and it is expected that they will be continued.

Mr. J. A. Doggett, of the Douglas Mining Company, who has just returned from its properties on Sturgeon Lake, is much impressed with the mining possibilities of that country. He predicts a great boom in the section when the Grand Trunk Pacific has completed its main line, which is expected to be finished as far as the north end of the lake by July, 1908.

Larder Lake Claims. Larder Lake Claims.

A number of mining companies are hard at work on their claims, getting things in shape for early development. One of the most energetic companies now at active work is the Tourneine Mining Co., Ltd., 40 Yonge street Arcade, Toronto (commonly known as the Old Indian.) This company has now a gang of about twenty men on their claims, in charge of Mr. Elgin Binkley.

Of Those Interested In Mountai Front Scheme.

Mr. R. T. Steele, acting for the Board of Trade, has called a meeting for tomorrow afternoon, at the board rooms, of all those who are interested in the
