Process of Making Postage Stamps. Process of Making Postage Stamps.
Every part of postage-stamp making is done by hand. The designs are engraved on steel, 200 stamps on a single plate. These plates are inked by two men, and then are printed by a girl and a man on a large hand press. They are dried as fast as printed and then gummed with a starch paste made from potatoes. This paste is dried by placing the sheets in a steam fanning machine, and then the stamps are subjected to a pressure of 2,000 tons in a hydraulic press. Next the sheets are cut so that each one contains 100 stamps, after which the paper between the stamps is perforated, and after being pressed the sheets are tiled away. If a single stamp is injured the whole sheet is burned.—[St. Pau Pioneer Press.
