Itching

If there is one thing more than another which gratifles us, it is the great volume of hearty thanks which come from grateful parents for the cures Hood's Sarsaparilla has effected | pon their children. The agony of | Condition of Affairs Redespair turns to nuspeakable joy as mothers and fathers see dreadful sores and eruptions gradually yield to the potent purifying power of this great medicine, and bright boys and girls given perfect health. Read this:

"When my baby was four weeks old, scrofulous ecrema broke out on his body. Two Polling Books Have He became literally covered with

When six months old the breaking out healed on his body, but his head, face and arms were a terrible sight. I passed many sleepless nights holding his little hands to keep him from scratching his face. I cannot tell what besuffered with the sores. One doctor attended him a year without avail. No one thought he would ever get well. He was almost a year old when I commenced to give him Hood's Sarsapatilla. He soon grew so much better that

fores on his head and arms healed, the burning and itching ceased, and he slept better. In 2 months he looked like another child, gained strength, was cured. I recommend all persons afflicted with eczema or any skin disease to take Hood's Barsaparilla. I feel assured that it will Go wenders for others. I cannot praise It too highly for what it has done for my

Door little sufferer. It is hard to believe he is the same child, he is now such a big, hearty, fat boy, a very picture of health. If more people would give Hood's Barsaparilla to their children, there would hot be so many poor, delicate little ones." MRS. AGNES C. BAILEY, Box 91, McVeytown, Pennsylvania.

This and other similar cures prove that

vealed at the Summing Up.

Gone Amissing.

Six of the Required Statements Not Filled In.

And the Oaths in Many Cases Not Taken.

Peculiar Work by Franklin Wright's Deputies.

Will be Subpoenaed to Appear on Tuesday,

And Give an Account of Themselves

The Proceedings This Morning.

A singular and shocking state of affairs was revealed at the summing up of the returning officer for the London election this morning. Early in the proceedings it was discovered that many of the returning officers had neglected to make the required statement, some had failed to take the necessary oaths in making their returns, and in two instances the poll book was missing altogether.

The proceedings were billed to commence at 11 a.m. in Franklin Wright's offices at the court house. At 10:30 Mr. Wright and his clerk were on hand, and commenced transferring the tin ballot boxes from the vaul to the room where the summing up was to be held. The slots of the majority of them were tightly sealed with a superabundance of sealing

PROCEEDINGS COMMENCE. A few moments before the allotted time Mr. Thomas Beattle arrived, accompanied by Mr. I. F. Hellmuth, his agent. Messrs. J. B. McKillop and W. J. Harvey, who represented Mr. C. S. Hyman, arrived a moment later, and Is the One True Blood Purifier. All druggists. \$1.

After the Visit.

Messrs. McGuigan and Morrice Inspected the G. T. R. Yards and Buildings.

Offices-The Car Shops Good News -Canadian Levalty.

While the rest of the presidential party were enjoying the ride about the city and suburbs in an electric gan and Assistant Superintendent Morrice paid a visit of inspection through the yard and railway buildings.

The men at the freight house were expecting a visit of the whole party, and were filled with the same feeling that comes over the soldier when "the general comes." But Messrs. McGuigan and Morrice looked in at the west end, and then went through the yard and looked in again at the east end, of the inspection.

The two also visited the roundhouse and down-town repair shops, and got back to the station before the other

party.
Ald. Dreaney was a fortunate man. He knew nothing about the visit of the president and his party and came down to the station to go to the St. Thomas races. When he saw who was in town he had no more thought for the races, and set about verifying for himself the good news that the shops would soon be under way. Much was said about the shops to individual members of the which set their minds at ease, and to publish which would only serve to antagonize rival cities. It was good news indeed to Londoners to have the president himself tell them that the company had not changed its mind and that the shops would shortly be

professional competition record of 7:38 1-5, by James Deeming, of Wellington, B. C., has been allowed. Riders are notified that claims for record blanks are in the hands of every district chairman, and if they wish the board to pass upon the records which are made, it is necessary to

have a blank filed with the Dominson board. BICYCLE INTOXICATION. Since bicycling has become so popular the doctors have, as we have repeatedly reported, discovered various new ailments and injurious effects that result from riding. The latest investigation by a French physician has resulted in finding that cyclists are subject to the "vibratory habit. Unknown to themselves they develop a general vibratory condition of the body. They become like a human tuning fork, which vibrates at high much to the disappointment of many tension. Dr. Petit gave the French Academy of Medicine the results of his observations, and since then French and English bicyclists have been surprised, when they have complained to their medical advisers, that they felt unusually restless and could not account for the reason, to learn that had unconsciously acquired the "vibratory habit." According to Ben-jamin Ward Richardson, all bicyclists are not similarly affected, their natural nervous conditions having much to do with the development of the disease. Riders who are careful to pedal in moderation, and who do not let their minds run on bicycles, free from any evidence of the disease. But among the enthusiasts he finds the vibratory habit is rapiddeveloping. He declares that it lies a menace to the future health of thousands of riders who refuse to confine their enthusiasm within a reasonable limit. The new disease is a kind of intoxication of movement, that is shown in an unconscious, or semi-unconscious bearing of the body. which becomes especially plain when great steadiness is called for, as for instance, in sitting for a photograph. is shown also in an over desire for rapidity of motion, as if it were necessary at every moment to overcome time and curtail distance by labor of an extreme kind. The con stant impression given is that the sufferer, from this general vibratory condition of the body, must jump on his wheel and be off, although the weather and circumstances are not opportune for riding. The whole manner bespeaks haste, although there is not the slightest occasion for it. Sir Benjamin declares that this intoxication for motion grows in the mind by what it feeds on and keeps the heart under Cameron states: "I was confined to the impression that it is always requiring the stimulation of exercise. the devotee of the wheel thinks morning, noon, and night of riding,
