The Late James McCarroll, The announcement of the death of Mr, mes McCarroll in New York on Sunday, the 10th inst, will be received with great again appeared in the Police Court charged grief by his numerous friends in Canada, with cruelty to their children. The allega grief by his numerous friends in Canada, where he was universally known and admired. Born at Lanesboro, County Longford, Ireland, in 1815, he came at an early age to this country and engaged in literary work. To The Morning Chronicle of Quebeche was a large contributor, and on taking uphis abode in Toronto became the musical critic of the since defunct Leader and The Colonist, and the columns of The Grumbler, a well-remembered little satirical sheet published here some 30 years ago, were often illumed by the sparkling wit of this versatile writer. After serving in several official positions in Canada Mr. McCarroll was attracted to the great city of New York, where he wrote for the press, contributing numerous valuable scientific articles to the daily papers. He also assisted in the compliation of "The People's Encyclopædia" and "Appletton's Encyclopædia" and "Aretwards was connected with Belford's Magazine, and latterly acted as co-editor of Humanity and Health. He was a prodigious worker and produced numerous poems, of which a volume has been published, besides essays, reviews, dramas, novels, etc. His prowess also extended to the lecture platform, and both as a musician and a musical composer his success was marked. Many valuable inventions also owe their existence to his fertile brain. The sad event which we record is the subject of extended notices in The Tribune, The Herald, and in all the chief New York dailies.

A New Horse Market.

At a meeting of the leading horsebreeders of the province held at the Walker House a Dominion Horse Sale Association was organized Mr. Frank Keily, Glen Colin, occupied the chair. The object of the association is to establish a central market, whore a register is to be kept that purchasers the world over may see every horse of any class for sale in Canada. A catalog will be published every few months and sent to the United States and England, showing the age and price of each horse.

These officers were elected: President, Merit Charlton. Aylmer, Ont.; first vice-president, Frank Kelly, Glen Colin; second vice-president, Cliver Jarvis, second vice-president vice-pres A New Horse Market. United States and England, showing the age and price of each horse.

the great horse-breeding countries, when it was resolved that breeders should be warned that the future value of horses so treated may be seriously depreciated.

As the Duke of Portland occupied the Dignum, Elias Rogers, Robert Kilgour, Stapleton Caldecott.

As the Duke of Portland occupied the chair when this resolution was passed, and was supported by the Earl of Coventry and other breeders, one may fairly presume that the eyes of mankind, and especially of horse owners, will be opened to the folly as well as the cruelty of tail-docking for fashion. We are enabled to accentuate the protest of the Royal Commission by conclusive and overwhelming confirmation.

Last year 102 well-defined cases of tetanus (lock jaw) resulting from docking were reported by the officers of the R.S.P.C.A., assurances having been given to them on the spot in each case by a veterinary surgery in attendance.

on the spot in each case by a veterinary surgery in attendance.

There may have been ten times as many similar results from docking throughout the United Kingdom as inferred from a statement just received (in addition to the returns of the society's officers) from a veterinarian, to the effect that during 1891 he was called in to 31 horses suffering from tetanus, in 27 of which the malady had been general solds by docking.

caused solely by docking.

Two cases a month in one man's practice reveals a peril which may startle and waru every horse-owner, while it justifies the society in pursuing its opposition to so baneful and cruel a practice.

How She Became a Missionary. "I'm doing missionary work a good deal of the time," was the reply of one of the most charming women of New York to a friend who asked how she busied herself. "I see by your looks you wonder what I mean by that. I'll tell you. A How does he wonder what I mean by that. I'll tell you. A
few years ago life was a burden to me. I had
been a victim to female weakness of the most
aggravated character for a long time, and the
doctors failed to help me. Existence was a long,
steady, terrible torture—a lingering, living death.
One day I saw Dr. Pierce's Favorite Prescription
advertised in the newspaper. Something in the
advertisement impressed me favorably I caught
at the glimmer of hope it held out as the drowning man is said to catch at a straw. Still I did
not dare to hope. But I got the medicine, and
behold the result! I feel so well, so strong, and
O, so thankful, that I go about telling, other women what savedeme. In no other way can I so
well show my gratitude to God, and to the man
who has proved such a benefactor of women, and
my love for my suffering sisterhood."

Henry Allen & Co., New York, to John J. Dix & Co.: The coal stocks have been the strot features in to-day's market. All have advance A prospective advance of 25 cents in the price anthracite has helped along this boom, but the are apparently some things still more importain the situation. Reading's controllers are high feather; there is little doubt but that inte est on all company's bonds, incomes included, sure to be earned along with a probable divided in the stock. A month or two ago this wou have sounded like wild talk, but it is indicative the overwheiming changes that have come into the property that this is now the expectation of many important and conservative calculators closely acquainted with the situation. Money being cheap the whole stock list ought to show new life and strength. The granger stocks are generally in a good position to be bulled and the most conspicuous specialties are in shape to respond to anything like well-organized support. The bull contingent, if it has any strength whatever, will be likely to exert itself and accomplish something next week. On any reaction we be lieve stocks generally to be a purchase.
