

HIS WIFE GONE AWAY.

A Young Lawyer of the Name Social Set
Also Missing—A Boston

New York, Dec. 4.—A morning paper has the following special from Boston: Mrs. Francis L. Higginson, wife of the famous banker, and a special favorite, has been missing for some time. She has been gone over two weeks. There is also missing from the same social set Mr. James Wheatland Smith, a young lawyer, who was graduated from Harvard in the class of '89, and who since then has been practicing his profession with the late ex-Governor Gaston. Mrs. Higginson is about 33 years of age and the mother of four children, one of them a charming girl of 17, who was to have been brought out this season. Smith is only 23. The two have been friends in society for some months past, and the young man's devotion to the matron has caused considerable comment. It is believed Mrs. Higginson and young Smith took passage on the steamship Columbia, of the Ham-burg-American line, for Genoa. So far there is much wrong in the story, as the principals are heartbroken. Mrs. Higginson was a Miss Borland, the daughter of a Back Bay physician, now deceased. She is looked upon as an unusually handsome and well-developed woman. James Wheatland Smith was inclined to be rather dissipated at college, and was suspended for a year because of obscene pictures found in his room. He was a member of several of the best clubs, an amateur athlete and made a specialty of boxing.

ORGAN RECITAL.

An Excellent Entertainment at St. Paul's Church.

(Simcoe Reformer.)
That's a pretty nice piece of furniture recently added to St. Paul's Church, being the new organ put in by the Williams Co.

The formal opening took place on the evening of Thanksgiving Day and Prof. Aldous of Hamilton gave a demonstration of what he could do with the organ when he felt in good humor and incidentally displayed the fine points of the instrument to the advantage. The musical editor is out of town this week or the Reformer would tell about the organ and the stopped diapason, the melodia dulciana, viola, harmonic flute, the bassoon, etc., and how they all behave, but under the circumstances, readers will have to forego that pleasure.

The professor seemed to be quite familiar with the instrument and pounded and thumped it with hands and feet, as though it didn't cost \$300. He made grand music though, and that's what it was intended for. The audience was charmed with his execution, and he was given many well merited encores. The other portion of the program was given by Mr. Huntington and Miss O'Keefe of London, and Miss Innes of Simcoe.

The following is the report of Prof. Aldous on the new organ in St. Paul's Church: George Williamson, Esq., Dear Sir:—On the afternoon of Nov. 21, I made a very thorough inspection of your new organ in every way, and without a single exception, I find that it conforms to the contract in every particular that is put into it is exceedingly good—the most minute details being very carefully finished.

I consider the tone in every respect equal to the workmanlike. The diapason tone is full and round; the flutes mellow and sweet; and the one reed (oboe) is, I consider, in every way equal to the orchestral instrument. I was especially pleased to find that the pedal-board was not unduly heavy as is so often the case where there is only one pedal stop.

Really I have no single objection to make. I consider that you have not only a very satisfactory organ, but a remarkably cheap one at the price.

The Queen's Own Sergeants.
The regimental orders of the Queen's Own Rifles, issued by Lieutenant-Colonel Hamilton yesterday, contained a notice that the resignation of Sergeant H. M. George had been accepted. This is the outcome of the trouble which is alleged to have arisen between the sergeant and the officers of the regiment, particulars of which have already been published in the World.

Another important notice in the orders is that all sergeants of the supernumerary list are abolished. It is said that the disagreement between the officers and the sergeants was to a large extent due to the supernumerary sergeants, and in accordance with a message was for a time closed.

Gas Mains on Broadway-Avenue.
Editor World: Four editorial in yesterday's World on the above subject is to the point, and the ratepayers in our section of the city are glad that one paper has the courage to tell the Gas Company what we have been trying for the last three years to get the Gas Company to do with gas. But they say unless we give a guarantee they will not do so. The company can't be made to do anything for the purpose of choking off a rival company. They have also been told by the Gas Board and along Withrow-avenue. But they are not to be taken in by the Gas Board and Danforth-avenue cannot get the rights other citizens enjoy. Of course it may have been foolish to build in this section of the city.

Some of the citizens of the city are unjustly withholding from the citizens the right to be paid for the gas they lay down a main on Broadway-avenue, besides giving needy citizens a little work. If the company is to be correct in this matter, then the ratepayers have no power to compel the company to lay the main near the corner of Yonge and King-street, and the city at the mercy of the company. If the opinion of the city council is adverse to us. Then, as you say, legislation ought to be sought at once for the purpose of giving the city power to compel the company to supply all citizens with gas.

The company got their charter on the ground that the citizens were to be supplied with cheap gas. And as they enjoy a monopoly it may be worth while if the city asks the Legislature to cancel the charter with gas as one of their reasons for seeking cancellation of the charter. GEO. D. BODD, 2 Batty-street.

Lungs Closed Up.
Gents.—In the early part of the winter I caught a cold, followed by severe cough. I could not sleep, as my lungs seemed closed up. I could walk only a few yards without stopping to get my breath. I sent for my Emulsion, and before I had finished the third bottle the cough was gone, I could breathe freely, and felt like a new man. I advise all who are troubled with colds, coughs or asthma to give Milbourn's Cod Liver Oil Emulsion a trial. 245 AVON ST. HILL, 245 Tenny Cope, Hants Co., N.S.

Not Hutchinson, Nisbet & Auld.
The World regrets having stated, by error, in its issue of yesterday, that R. Darling & Co. had purchased the stock of Hutchinson, Dignum & Nisbet. It should have read the stock of E. J. Dignum & Co.

Messrs. Hutchinson and Nisbet left the firm some time ago and have since been, and are now, conducting a successful wholesale woolen business at 34 Wellington-street, west, under the style of Hutchinson, Nisbet & Auld.

Dyspepsia and Indigestion.—W. Snow & Co., Syracuse, N.Y., with a guarantee send us ten gross of pills. We are selling more of them than any other pills we ever keep. They have a great reputation for the cure of Dyspepsia and Indigestion. Mr. Chas. A. Smith, Lindsay, writes: "Farmers' Pills are an excellent medicine. My sister has been troubled with severe headache, but these pills have cured her."

CLEAR THE SIDEWALKS.

Civic Regulation Compelling the Removal of Snow and Ice from the Sidewalks and Streets.

During the present wintry visitation which has brought with it the usual presence of ice and snow on the sidewalks of Toronto, the existing bylaw with respect to such matters is worth noting. The Ontario Legislature has passed regulations dealing with the liability of the City Council toward persons injured by falling on icy sidewalks, but the civic bylaw defines the duty of citizens as follows: "Every occupant, and in case there is no occupant, the owner of every house, shop, building, lot or parcel of land, and every person having charge or care of any church, chapel, or other public building, fronting or abutting on any street where the sidewalks are planked or paved shall, within the first four hours after every fall of snow, or fall of hail or rain which shall freeze on the sidewalks, or in the drains, gutters or water-courses, or after a fall of snow from any building, cause the same to be cleared of snow, ice, or other substance, and to the breadth of one foot out of the drains, gutters, or water-courses, or in the house, shop, church, chapel, building lot or parcel of land; and in case of ice or snow shall, within the first four hours after every fall of snow, or fall of hail or rain which shall freeze on the sidewalks, or in the drains, gutters, or water-courses, or after a fall of snow from any building, cause the same to be cleared of snow, ice, or other substance, but no person shall sprinkle, spread or place any substance on the road or carriage way of any street with the intent or for the purpose of dissolving any snow, ice or dirt which may have accumulated on any road or carriage way."

Subsequent ordinances provide for the City Engineer's clearing the sidewalks of the delinquent householder at his own expense.

Assistant City Solicitor Chisholm has cases in hand under the existing bylaws.

The Manitoba School Question.
Editor World: I furnish for insertion in The World the following points in relation to this question for the consideration of your numerous readers.

1. From the judicial throne of the British Empire comes the declaration that in relation to Manitoba Schools the pages of Roman Catholic children in the province of Quebec, a Protestant and an educationalist of high reputation, after a thorough investigation, also declares that they have a grievance.

In harmony with the same view, the Government has granted to some schools "remedial" relief. Thus we have a three-fold proof that relief should be granted and that the Manitoba Government has a grievance.

2. The president for such relief is found in the Province of Quebec, where Protestant children have their own schools, and in Ontario where Catholic children have their own schools, and as recently seen in Ottawa, the teachers of both faiths must have similar qualifications.

3. It is a pity that, like Ireland, Canada cannot have purely national schools. It is a pity that so many of our young people sent to Canada, which is not true should not be sectarian, and yet could be religious this far—the reading from the four Gospels in the morning and from the Psalms in the evening, and therewith uniform prayers be used, one for morning and one for evening, and the same for the day. In the meantime, however, we are subject to conditions which must be taken into consideration. One of these is political expediency, which uses the school question as a "shibboleth," which enables the ignorant members of trouble to excite and to distort the facts and to demonstrate the majority of voters, who, through the bigotry and deluding statements of our unprincipled politicians, are disqualified from giving a correct judicial vote.

4. Confederation was founded upon the brotherly principle of doing as we would be done by. That the children of Protestants should not have Roman Catholic faiths engraved upon their minds, nor Protestant faiths upon those of Catholics, is a matter of common sense. It is profitable to understand that the Roman Catholic Church is a providence of God, as well as the national Church of Monarchical Governments, and therewith nearly if not all the common sense of the world. From, even the Salvation Army, the proof of which is the good they accomplish. There is not one that can throw a stone at another without its hurting itself, for there is not one of us who can prove beyond the teaching of Christ in the four Gospels that their faiths, creeds or formulas are true, or longer are this it would have been done. And there is no slur upon them that they have been unable to do so, for it is predicted by the Revelation that mystery in relation thereto would exist until in the rising of the sun, of Righteousness, the darknesses swept away, and all mystery come to an end, when He shall clothe the Church with white raiment, the righteousness of the Saints, that is with the doctrines of Christ as they are believed in His celestial mansion.

In view of these facts, should not every Canadian exercise brotherly love sufficient to willingly permit each of these religious factors, the wings of the Christian Church, to train up their children in a knowledge of Christ in the way they deem essential to their best interests, and therein neither of the two wings arrogate to itself the belief that it is more perfect than its neighbor, but with Christ for the central factor for each to emulate, acknowledge that there are excellencies in each worthy of the admiration of both? And that in this way brotherly educational unity should prevail until, in the dawning brighter day of the eternal earthly jubilee promised, there shall, under the earthly leadership of the Sun of Righteousness only be "one faith, one hope and one baptism."

5. It is reported that the Manitoba Government declares it will not be "coerced" into any "remedial" legislation, into taking the testimony of the three witnesses cited clearly proves should in equity be done. If the individuals who compose the Ministry have any regard for their oath of office.

6. What shall the remedial legislation be? The Dominion Government has no organization for levying and collecting taxes, and cannot establish one. Neither should any other province have a special tax levied upon it for school purposes in aid of the Dominion consolidated fund. It is fully admitted that Manitoba cannot be driven, and there is any necessity therefore? The Dominion Government holds the national purse, the assistance is granted to be indirectly equitably distributed. In part it goes to pay for the Ministry. If the Manitoba Government, in violation of its oath of office, refuses to legislate for its equitable distribution pro rata for each scholar, irrespective of the faith they hold, shall it not become the duty of the Dominion Government to retain in hand sufficient of the annual subsidy to pay the amount which the Manitoba Government refuses to apportion? That principle governs in Ontario. Each school section is entitled to a subsidy on certain conditions. If they are not complied with the money is withheld until they are. If the Government of Manitoba, in its blindness, refuses the "remedial" legislation admitted to be necessary, shall the Dominion Government retain sufficient of the subsidy annually according to Manitoba to pay the pro rata allowance to each scholar of the other

THE PROVINCIAL HOTELS.

Treasurer Harcourt Can See No Necessity of a Sanitary Expert.

Hon. Mr. Harcourt, in conversation with a World reporter yesterday upon the question of the appointment of a sanitary expert to inspect provincial hotels, as asked for by the commercial travelers, said that such an appointment was unnecessary. He felt convinced that the reforms asked for could be effected through existing machinery. He and his department had never more than once endeavored to co-operate with the travelers, who could point out where evils existed, as they were familiar with the ground. No specific cases had been pointed out, however, and consequently where existing they had remained uncorrected. The matter was one not only of importance to the commercial men but to the traveling public generally and the intention was to issue circulars to local Boards of Health to exercise strict inspection over all licensed hotels. He pointed out that these boards of health existed in every riding, and often in places where there were no hotels. He said that there were the regular license inspectors, who would be similarly instructed, and when the compulsory reports were received from both sources the license of that hotel would be withdrawn. The Provincial Treasurer seemed an enthusiast on sanitary reforms, and ascertained that his interests would be safe in his hands.

BRANTFORD IS SUCCESSFUL.
Chief Graham Recommends the Purchase of a Watrous Engine for \$3000.

The Fire and Light Committee sat for a bare half hour yesterday afternoon and adopted the report of the Chief of the Department, recommending the acceptance of the tenders for the purchase of the fire engines. There were present Chairman McMurich and Aldermen Allen, Bell, and Gault.

Chief Graham's report pronounced in favor of the tenders submitted by the Watrous Co. of Brantford for a large engine, guaranteed for five years, at \$3000, and by the manufacturers of the La France engine, a smaller one, guaranteed for ten years, at \$4500. The latter tender was chosen in the event of the committee deciding to buy a second machine.

The committee decided to recommend the purchase of the Watrous engine and let the purchase of the other engine stand until it could be ascertained if funds are available to buy a second machine.

Tender number three was reported as being the chief because while in other ways the engine is perfectly satisfactory, the weight is such as to render the purchase inadvisable. It is generally understood that this is the Watrous engine.

Another offer which was reported against was disapproved because the tender was not made with a view to guarantee any distances to which the engine will be hauled. This is probably the Ronald tender.

The La France engine is manufactured at Elmira, N.Y.

Dr. Barnardo's Children.
Editor World: Permit me to enter an earnest protest against the lampoon that appeared in your paper on the 27th inst. against Dr. Barnardo and his hospital for orphan and waif children in London.

I appeal to you not to allow your indignation and well-meant paper to be made the medium of circulating what I can positively assert is not accurate and misleading information. In the picture I have referred to is one that is calculated to do even more harm than columns of printed matter as it catches the eye and conveys to the mind in a moment what any amount of reading might fail to do. It is most likely that very many will see and scan this picture, who have no time to read more than purely general news.

I am in a position to speak, "by the book," as it were, in this matter, as during my last visit to London I carefully inspected Dr. Barnardo's hospital. His request I addressed a little band just about to be sent off to Canada, and I can assure you that they were compared very favorably with any similar number of boys that might be collected anywhere in this country. The fact that these boys are all bespoken before they arrive in Canada speaks volumes for the character of the institution.

In one of his late reports, Dr. Barnardo was able to state that, after specially commending with the Minister of Justice at Ottawa, less than two per cent. of his young people sent to Canada "more than 900 in all," were failures. This statement is one that can easily be disproved if untrue.

Permit me to quote, shortly, from a late report of these homes. Among the principles laid down governing the management of the boys, we find the following: "Only the flower of my flock shall be emigrated to Canada; those who are thoroughly good, honest, and virtuous; (2) who are industrious and have been industriously trained in our own workhouse; (3) who, being boys, have had careful instruction in domestic pursuits."

Importation of these children is a benefit to Canada. It is a source of great regret to me that many who might help forward this Christ-like work of Dr. Barnardo, if not substantially, yet by kind and encouraging words, doing all in their power to hinder it. I know of no work for the benefit of humanity, in the present day, that is more worthy of support than this. I send you, with this, the last annual report of these homes, and if, after a careful and dispassionate perusal of it, you find yourself unable to say anything for this work, I appeal to you not to say anything against it till you have weighed well the whole evidence.

JOHN A. ARDAGH.
Barrie, Nov. 28.

DISEASED LUNGS
CURED BY TAKING
AYER'S Cherry Pectoral.

"I contracted a severe cold, which settled on my lungs, and I did not get on my feet for a long time. I then consulted a doctor, who found on examination that the upper part of the left lung was badly affected. The medicines he gave me did not seem to do any good, and I determined to try Ayer's Cherry Pectoral. After taking a few bottles I was relieved, and before I had finished the bottle I was cured. —A. LEVINE, watchmaker, Orangeville, Ont."

Big Holiday Sale of HANDKERCHIEFS.

We have just consummated one of the largest purchases of Handkerchiefs ever made by any retail house in Canada, amounting to over

25,000 Dozen of the Very Choicest Lines.

An extensive wholesale importer received a cablegram from the manufacturers offering to close out their entire season's production. He knew of no other house that could use such an enormous quantity and therefore came to us. The result is we secured the goods at virtually our own prices, and we assert that this is the cheapest lot ever offered in this city. These Handkerchiefs will be placed on sale to-day. The following is only a partial list:

LADIES' EMBROIDERED and HEMSTITCHED
JAPANESE SILK HANDKERCHIEFS in White and Colors
at 10c, at 15c, at 25c; really worth double.

HEAVY QUALITY JAPANESE SILK HANDKERCHIEFS
Plain Hem, 19 to 21-inch size, at 25c, worth 50c. Also 21, 22 and 23-inch size at 50c, worth \$1.00.

SPECIAL.
A Magnificent Assortment of Ladies' Real
Irish Linen Hand-Embroidered Handkerchiefs
Hemstitched and Scalloped, at Half-Price.

A Fine Collection of Ladies' Pure Linen
Initial Handkerchiefs in Handsome Boxes
Half-dozen in each box. Special for Holiday Presents. At \$1, at \$1.50, at \$2 per box.
