Comforts for the Farm.

(St. Thomas Journal.)
Ontario farmers may doubtless confidently count on receiving some practical benefits from Niagara Falls in the shape of electric light for their barns, through the agency of the Hydro Commission, before many years have passed. Problems will, of course, be encountered which were met with in serving power to the urban corporations, but the commission has already surmounted many difficulties and there is no reason to believe a few more will deter them. Hon. Adam Beck lives and thrives on problems and butts through stone walls with great cheerfulness. Mr. Beck and some of his engineers, as already announced, go to Europe this summer to study there the adaptations of electric energy to the needs of the farm.

The condition of the farmer is vastly different from what it was fifty, or even ten years ago—with his telephone, and his rural mail service, and a hundred and one other conveniences which have become necessities. Before long we may expect to see the farm house brilliant with electric lights, the chopper and the fanning mill and the turnip cutter, and the churn, the irons, the washing machine and all the other household and farm appliances operated by electric current, and the farmer and his wife going to town in a carriage driven by electricity!

Somebody has said that one of comforts of farming in the near future will be a phonograph to call the cows home. Perhaps the New farmer will sit at a desk and do his work by merely pushing buttons. Then all the men from the city will make their dreams come true and they'll all move out to the townships.

A steel deck on the submerged Maine which was originally half an inch thick and appeared still intact, fell to dust when it was stepped upon, even giving way under ordinary pressure of the hand, showing that it was corroded and rusted and set rotten through and through. It was also swollen very much in size. So much was this swelling that some of the bulk at low tide looked as if the old ship was suffering from some sort of leprosy of the sea.

Automobilists in England—they call them motorists over there—are much interested in the success of an invention known as "solid petrol," or gasoline in little bricks. Its exact composition is, of course, a secret. It contains 80 per cent. of ordinary gasoline, a percentage of soapy matter and 1 per cent of a foreign substance which gives it solidity. A small block of it is said to be equal to a gallon of liquid motive power, and its inventors say that enough to propel a car 1,200 miles can be carried in a little box on the running board of the machine.

Why go limping and whining about your corns when a 25 cent bottle of Hol-loway's Corn Cure will remove them? Give it a trial and you will not regret it.

A delicacy of Austrian savages is the flesh of snakes which, with the exception of the liver, is too dry and tasteless to appeal to the civilized palate. Meat is usually baked in a primitive oven, made by digging a hole about a foot deep in the ground. In the hole is built a fire, which is covered with stones. When the stones have become very hot the fire is extinguished and the stones are covered with green leaves, in which the meat is placed. The hole is then filled with earth and is not reopened until the time determined for the cooking of the meat has elapsed.

What Has Dandruff Got To Do With Baldness?

You see the statement every day that the one cause of baldness is dandruff. But is it?

True, dandruff often precedes the departure of the hair.

It is equally true that you know men with a shock of hair you can hardly pull a comb through, who have carried around a dandruff laden collar as long as you have known them.

You have also seen men whose scalp was kept as clean as a baby's whose hair was surely departing.

That dandruff talk sounds well and convinces a good many of us, but let us not fool ourselves.

Of course dandruff isn't a good thing to carry around, but it is only an indication.

The same trouble that causes the hair to fall out usually causes dandruff, so if you get at the cause and arrest the loss of hair, you will stop dandruff too.

Those who use Nyal's Hirsutine find the most satisfactory hair healer and hair restorer they have ever used. It does stop the hair from falling out.

It will also stop dandruff. Your Nyal Druggist cheerfully recommends it—\$1.00 and 50c in sprinker bottles.

BEAT HIM TO THE STATION.

The Message That Got There Before the Patrolman Did.
"When I was a patrolman," says a prominent detective, "there used to be a sergeant on the force who had it in for me. He reported me for various delinquencies, and—well, he's dead now, and I won't say anything against him. He got sick, and it was reported at the station that he wasn't expected to live. So the boss called me and told me to go around and see if I could do anything for the old fellow. I called at the home and asked if I could see him. They let me in. I tiptoed into the room where the sergeant was in bed and said, 'The lieutenant sent me around to see how you were getting along.'

"He spoke with difficulty, but I could make out what he said. 'Go back,' he grunted, 'and tell 'em that I'm getting along fine. The boys have fixed me up all right, and I don't need anything. I'm feeling better.'

"So I went back to the station. I was stopped a couple of times on my way and got in about half an hour later. Then I made my report. 'He says he's better and doesn't need anything,' says I. The lieutenant jumped up. 'Do you mean to say that you saw him?' says he. 'I did,' says I. 'And he told you he was all right?' 'Yes, sir.' 'You blamed liar!' shouts the lieutenant. 'I got a message ten minutes ago that he was dead!'

"And it was true. What do you think of that old scoundrel trying to get me in bad with his dying breath?"
—Cleveland Plain Dealer.

An interesting experiment was recently tried on a dairy farm near Toronto. A number of phonographs were placed in the stables at milking time, and the milking done to music. The cows seemed to enjoy the lively airs that were played, showed their appreciation by giving richer milk than usual. In further investigation confirms the results of this experiment the gramophone may become as common in the cowstables as it now is in the parlors.

"I wouldn't take a thousand dollars for the good VINOL has done me. I was told that Cod Liver Oil was the medicine I needed for my weakened condition and poor blood. I could not take the greasy mixture, and when our druggist told me that VINOL contained not only tonic iron but all the medicinal properties of Cod Liver Oil without the grease or oil or bad taste, I made up my mind that this was the medicine for me. I tried it and to-day am strong and well."

Catarrhal Deafness

Successfully Treated By

Catarrhozone

Deafness is not so common as blindness, yet thousands are more or less afflicted by it, and their comfort seriously interfered with.

Catarrhal deafness manifests itself but slowly, yet it must be acknowledged that the great majority of those who become totally deaf might have averted this unfortunate condition if they had treated the catarrhal inflammation at its beginning.

The only remedy that can be safely employed for all forms of catarrhal deafness is Catarrhozone. You simply charge the air you breathe with this healing, soothing agent, and by forcing it gently through the ears destroy the germ life which keeps up the inflammation, and at the same time by the soothing, healing action it heals the inflamed surfaces of the middle ear.

CATARRHOZONE, to those who are just a little deaf, and are growing increasingly deaf, is an agent capable of affording the utmost satisfaction, and its use is attended without danger, and as the treatment can be carried on at home no person threatened with the affliction of deafness should postpone one moment in beginning its use.

From every part of the Dominion glowing accounts of the beneficial action it exerts upon catarrhal conditions of the middle ear have been sent in, and you will be resorting to the only method of cure, and the simplest method too, if you try Catarrhozone. Dealers everywhere sell it, 25c, 50c, and \$1.00. By mail from The Catarrhozone Co., Buffalo, N. Y., and Kingston, Ont.

SOMETHING THAT SHOULD BE RUBBED IN.—Whenever pain is felt in the limbs or back, take Dr. Thomas' Electric Oil; pour a little in the hand, and applying it to the surface beneath which the pain lies, rub briskly. If the first application does not afford relief, which is not usually the case, keep rubbing. The Oil will gradually penetrate to the affected part and relief will come.
