satisfaction to every inmate, and which in absence draws back the heart by the fond associations of comfort and content. Let this be done, and this sacred spot will become surely the scene of cheerfulness, kindness and peace. Ye parents who would have your children happy, be industrious to bring them in the midst of a pleasant, a cheerful and happy home. Waste not your time in accumulating wealth for them, but fill their minds and souls in the way proposed, with the seeds of virtue and true prosperity.—Southern Pioneer.

Doing Good .- 'Instead of showing our love to our country by engaging eagerly in the strife of parties, let us choose to signalize it rather by beneficence, and by an exemplary discharge of the duties of private life, under the persuasion that that man, in the final issue of things, will be seen to have been the best patriot, who is the best Christian. He who diffuses the most happiness, and mitigates the most distress within his own circle, is undoubtedly the best friend to his country and the world, since nothing more is necessary than for all men to imitate his conduct, to make the greatest part of the misery of the world cease in a moment. While the passion then of some is to shine, of some to govern, and of others to accumulate, let one great passion alone inflame our breasts, the passion which reason ratifies, which conscience approves, which heaven inspiresthat of being and doing good.

ELOCUTION.—This is a subject that has heretofore been very much neglected, but we are pleased to observe that an interest is beginning to be felt in it, and that this interest has even spread into our common schools. The advantages of a good manner are next to those of good matter. many instances the defects of a faulty discourse have been entirely hid, and an interest imparted by a fine style of delivery, which have rendered it more acceptable than a perfect discourse delivered without this assistance. The study of this art will be of great utility in our schools; it will improve the general manner of the scholars; give them a relish for committing to memory; and improve their memory, and their taste.

We are glad to observe the feeling which seems to animate the influential of all parties as to the policy of preserving prace with foreign nations. The motion of Mr. P. M. Stewart had, at any fate, the merit of eliciting this. While Ministers pursue their present course with regard to our foreign relations, they may rely on the approval of the country. War is the

worst of evils, and must be avoided at almost any

Perseverance.—"I recollect," says Sir Jonah Barrington, "in Queen's County to have seen a Mr. Clerk, who had been a working carpenter, and when making a bench for the Session Justices, at the Court-house, was laughed at for taking peculiar pains in planing and smoothing the seat of it. He smilingly observed, that he did so to m ke it easy for himself, as he was resolved he would never dut till he had a right to set thereon, and he kept his word.—He was an industrious man, honest, respectable and kind-hearted. He succeeded in all his efforts to accumulate an independence; his character kept pace with the increase of his property, and he lived to sit as a Magistrate on the very bench that he sawed and planed."
