Notes: 1) "Small" industrial facility denotes a facility of less than 5000 square feet.

2) "Large" industrial facility denotes a building of greater than 100,000 square feet.

3) "High Tech" denotes a high technology facility and includes buildings for R&D purposes.

4) Construction costs reflect general contractor costs, overhead and profit. They exclude architectural, engineering and financing fees.

5) "Location Factors" apply to the costs for materials and installation for a given commercial project and indicate the relative cost for various locations. For example, building a commercial facility in Madison would cost 93% of that of a similar facility in Chicago.
