APPENDIX C
APPROVED WORKSTATIONS

This is a list of makes and models of 386 microcomputers, which have been certified by at least one of the major LAN operating system vendors, being considered for COSICS II. A more precise list will be provided once the network operating system and the hardware platform have been selected. The System Development and Operations Division (MSS) is confident these units are compatible with and may be connected to the information network that is being designed and implemented for COSICS Phase II. This is a limited list; other units which do not appear on this list may also be fully compatible.

MAKE	MODEL
Acer	386
AST	386
Compaq	DESKPRO 386 or 386N
Dell	325P
Digital	325C
NEC	PowerMate 386
Olivetti	M386
Sidus	SCI-925C
Zenith	Z-386
