

SCHEDULE II - Continued

Information Respecting Manufacture

1.1 Maximum weighted aggregate quantity of chlorofluorocarbon permitted to be manufactured in current control period:

Manufacture reference weighted aggregate quantity that may be manufactured, pursuant to subsection 4(1) of the Regulations	_____	tonnes
Additional weighted aggregate quantity that may be manufactured, pursuant to subsection 4(4) of the Regulations		
(a) as a result of an agreement described in paragraph 4(4)(c) of the Regulations	+ _____	tonnes
(b) to be manufactured for export to a country operating under Article 5 of the Protocol	+ _____	tonnes
(c) as a result of an agreement described in paragraph 4(4)(e) of the Regulations	+ _____	tonnes
Reduction in maximum weighted aggregate quantity as a result of an agreement described in paragraph 4(4)(c) or 6(4)(c) of the Regulations	- _____	tonnes
Net maximum weighted aggregate quantity of chlorofluorocarbon permitted to be manufactured in current control period	= _____	tonnes

1.2(1) Weighted aggregate quantity of chlorofluorocarbon manufactured during reporting quarter:

Chlorofluorocarbon	Quantity Manufactured (tonnes)	Ozone- depleting Potential (ODP)	Weighted Quantity (tonnes x ODP)
trichlorofluoromethane	_____	1.0	_____ tonnes
dichlorodifluoromethane	_____	1.0	_____ tonnes
1,1,2-trichlorotrifluoroethane	_____	0.8	_____ tonnes
1,2-dichlorotetrafluoroethane	_____	1.0	_____ tonnes
chloropentafluoroethane	_____	0.6	_____ tonnes
Total			_____ tonnes
