Nearly 10,000,000 it was announced today, left for Europe this week from the eastern seaboard of the United States and Canada, a total almost 4,000,000 bushels ada, a total almost 4,000,000 bus ada, a total almost 4,000,000 business larger than for the corresponding time a year ago. This fact was mainly responsible for lifting the market to temporarily 3-8c above yesterday's close, but depression which had prevalled earlier set in again, and near

the close there was virtually no buy-ing except for shorts. Corn followed the action of wheat. Clear, cool weather tended to favor the pear side, and so also did slowness of cash demand.

Assertions that 1,000,000 bushels of oats had been sold here for export held the market strong despite weakness in other grain.

Provisions sagged under realizing by packers. It seemed to be a case where better prices for hogs gave an advantageous chance to unload.

### **GAIN IN CASH BY** NEW YURK BANKS

Again Declines.

NEW YORK, Oct. 2.—Purchase of bills on London by the \$100,000,000 gold pool and demand from independent sources brought about another decline in foreign exchange rates, cables falling to 496 ½ and sight drafts to 495 ½. Trading in these remittances was again fairly active as the result of the week's heavy grain and cotton exports. Grain shipments were some 2,600,000 bushels larger than in the preceding week and about 3,200,000 bushels in excess of the same week of 1918.

The enquiry for bonds, particularly those maturing within the next few years, was broader at concessions, which placed most of them on a six per cent. basis. Quotations for the new city notes were virtually unchanged, but out-of-town sales were changed, but out-of-town sales were more numerous, interior banks taking them as a "secondary reserve." There were wide estimates regarding the weekly movement of cash, forecasts indicating a gain by local institutions of from \$15,000,000 to \$25,000,000. Further contraction of loans is expected with concurrent reduction of deficit in cash reserves. Time money is gradualcash reserves. Time money is gradually coming back into the market, and the middle of the month is likely to show an easier tendency. This same condition will doubtless apply to com-mercial paper and other financial

Bank clearings continue to record pronounced contraction, the total at leading cities of the country showing a decrease of thirty-six per cent as compared with last year. The only exception to this condition is in the middle west, where the abnormal activity in grains has resulted in an increase of exchanges.
