KENTVILLE, N.S.

FOR Ordinary Conditions and Average Uses, the Standard

## "LEFFEL" or "VULCAN" Turbine

will fill the bill every time. Efficiency never been equalled. Can't miss your capacity. Made in 23 sizes, either right or left hand.

## The "PERFECTION" Turbine

is a cheaper Wheel in first cost, as it carries its own penstock, and admits of very inexpensive connection with head race. It has many friends.

For Unusual Conditions, and to Meet Any Possible Requirement, you can have a Special "LEFFEL" built to your order, as you would a dwelling house, so that what has heretofore been difficult of attainment in a Turbine—a combination of great power and high speed—is easily possible.

These Special Turbines can also be provided with the single Cylinder Gate, if desired, in preference to the usual Red principle. Under any and all circumstances, these Turbines are the *cheapest per horse power ever built*, and their qualities of Durability and Finish are not open to improvement.

For particulars of **TURBINES, LANE'S IMPROVED CIRCULAR SAW MILL, AUTOMATIC or HAND-FED SHINGLE MACHINES, GEARS, SHAFING, HANGERS, Etc.**, address
