

OPENING OUT IN CANADA.

The Buffalo Tool & Machine Company, who have temporary offices at 116 Bay Street, Toronto, are now engaged in the erection of extensive premises in the latter city. They are large manufacturers of wood and iron-working machinery. We hope to give an illustration of their works next month.

LUMBERMEN'S SNOW PLOUGHS.

The Wilkinson Plough Co., Limited, of Toronto, are making a plough for snow or ice roads which they claim is without a peer. The manager of this company states that the advertisement in last month's LUMBERMAN paid them well and was the means of booking several very large orders. The company's page ad. in this number is only another answer to the question "Does advertising pay?" We intend giving next month a description of the company's road makers and snow ploughs.

In addition to our large list of subscribers, this number of the CANADA LUMBERMAN is being sent to a thousand firms engaged in the lumber industry and in the manufacture and sale of saw mill

and wood-working machinery in Canada and the border States. If those who receive a copy will consult our advertising pages they will find therein everything that is required in any branch of the lumbering industry, especially machinery. The firms using these columns are the leading ones in their several lines. It will be to your advantage and will oblige both the publishers and advertisers when writing firms whose announcements appear in these pages if you will make mention of THE CANADA LUMBERMAN.
