

# COBALT—Fifteen Mines Pay Out Nearly \$5,000,000 in Thirteen Months

## SPECULATORS DISSATISFIED AT MARKET'S NARROWNESS

### Mining Markets Are Inactive, But With Evidence of Only One Weak Issue.

World Office, Wednesday Evening, Feb. 3.

Considerable apathy marks the present operations on the local mining exchanges. Speculators are dissatisfied with the markets for two reasons: first, because any general liquidation cannot be forced; and second, because there is too little outside buying to give quotations that buoyant freedom so essential to quick turns.

Disregarding the desire of speculators, public holders appear perfectly satisfied with their position. They are not anxious to see prices mounting up every day, but are prepared to wait for a natural, sure and warranted advance.

There was only one weak stock on the market to-day and that was Silver Queen. Holders of these shares are under some apprehension, sufficient in many instances to cause them to sell their stock at losses. Various rumors are afloat in connection with the company, but these lack confirmation.

The speculative movement in Gifford has not been entirely successful and after a further upward movement this morning the price dropped back over three points.

The standard shares were firm as a general thing and there was sufficient good absorption of Chambers-Ferland to advance the price of this issue.

The various transactions during the day showed the market to be under pressure, but it is certain that much of this came from traders who are anxious to make the market move either one way or the other in order to scalp profits.

### WORK ON MOOSE HORN

Machinery Not Yet in Operation at This Mine.

ELK LAKE, Feb. 3.—(Special).—The work at the Moose Horn is pushing along steadily. Good camps have been erected on the property, together with a shaft house. A steam boiler is in place and a steam hoist in operation, but the work of mining is being carried on by hand.

The shaft is present down to a depth of 85 feet, and going deeper every day. It is the intention of the contractors who have the work in hand to sink the shaft to the 125 foot level, and then drift for 100 feet to catch the veins which have been uncovered on the surface.

This work is to be completed by next June, and by that time the Moose Horn should be in a position to ship good ore.

### QUEEN STOCK WEAK

Rumors Are Current That Company May Pass Next Dividend.

Weakness in Silver Queen stock was the principal point in discussion around mining circles yesterday. There was a certain amount of reticence among brokers in expressing their views on the weakness, but a general impression gathered was that the company will pass its next dividend. This belief and the fact that the company has not shipped any ore for a long time is the material for building up a bearish attitude on the stock and is no doubt responsible for the recent selling of the shares.

ELK LAKE DISCOVERY.

Elk Lake Discovery was listed on the mining department of the Toronto Stock Exchange to-day. This is the second Montreal River company to have its stock listed on the exchange. Trading in the shares was not large owing to its newness, but two transactions were made, the sale price being \$2.

### MINING BROKERS ASSIGN.

Messrs. Stewart and Lockwood, members of the Standard Stock and Mining Exchange, with offices at 18 East Adelaide-street, made an assignment yesterday to J. E. Carter & Co., of the firm's business and assets. The liabilities are small, and a satisfactory adjustment with creditors is expected to be made.

At 5 o'clock last night the first official party to make the trip over the Canadian Northern Ontario new route to the silver lands of Gow Ganda left the Union Station bound for Sellwood. There they will continue the journey in the passenger sleighs of the C. N. O. to the Gow Ganda mine, where they will make a visit to all the properties in this new mining camp with a view of reporting as to its bearing on the expansion policy of railroad interests in that country.

The party may be out ten days.

To Wind Up Company.

An order has been applied for to wind up the Gleggery Cobalt Mines. The petitioner, Dr. George P. Condon, claims that lands purchased on the basis of \$4000 cash and 250,000 shares at a par value of \$1 have not been received by the secretary to the company.

O'BRIEN MINE REVENUE.

A cheque for \$45,518.29 was received by the provincial treasurer yesterday from the O'Brien Mine, being the 25 per cent. royalty for the last three months of 1908. It will be credited to receipts for 1909.

Must Pay the Insurance.

SAN FRANCISCO, Calif., Feb. 3.—Judge Van Orman has ordered the O'Brien aggregating more than \$600,000 against insurance companies, which refused to pay in full the insurance carried by the O'Brien mine, which was destroyed in 1906. In all 104 cases were on the calendar, and 88 were decided adversely to the insurance companies.

PRICE OF SILVER.

Five Million Dollars Distributed to Shareholders—Some of the Camp Doings.

COBALT, Feb. 3.—(From the Man on the Spot).—The payment by 15 Cobalt mines of nearly five million dollars in dividends during the past 13 months; the increased tonnage and greatly increased silver production; the number of new plants in operation in various sections of the camp, are the most satisfying evidences of the camp's greatness and stability.

Last week's shipments of nearly 900 tons went to Denver, Carnegie, Copper Cliff and Trout Mills smelters.

This latter smelter is generally known as Perth Amboy. Over 50 men are employed there. The Temiskaming and McKinley-Darraig shipments of last week were sent there.

The first car of high grade ore from the Chambers-Ferland mine was sent out this week. It consisted of 25 tons that will average over 4000 ounces of silver to the ton, and the ore is being treated at Perth Amboy. Over 50 men and eight drills are working steadily at this mine under Supt. Jeffrey.

At the Temiskaming the new plant is now running and 10 drills at work night and day. The largest hoist in the camp (double-drum) is in operation here. It is capable of raising 9000 lbs. from a depth of 700 feet in one minute.

New ore-sorting tables have been added in the old ore house and the silver production from this mine will be very heavy. Two tons of high grade and three tons of second grade are being mined daily.

Supt. Herman at the Progress has started the diamond drill at work and will prove the new Gifford Extension vein at a depth of 200 feet.

Arthur A. Cole, M.E.; Jos. Houston of the Right of Way and Chief Engineer McCarthy have gone to Gowganda to look over the many good things there.

The new Gifford shaft is down nearly 46 feet. The vein shows up the entire depth. Timbering has been done all the way down.

The O'Brien concentrator will be the biggest and one of the most complete in the camp. The building is nearing completion and most of the plant is on the ground.

The LA Rose is shipping high grade ore from the raise made at the 200 ft. level. The ore contains very little calcite. The vein is 11 inches wide of cobalt and silver. The wallrock on either side of the vein is heavily shot with native silver and another concentrator may be looked for at this mine.

Frank Burr Messure, Batley-Cobalt.

Smiley, Stanley and McCausland report the close of Batley-Cobalt on the New York Produce Exchange at 31 to 31 1/2.

### OPENING A NEW ROAD.

First Official Party Over C.N.O.'s New Line to Gowganda.

At 5 o'clock last night the first official party to make the trip over the Canadian Northern Ontario new route to the silver lands of Gow Ganda left the Union Station bound for Sellwood. There they will continue the journey in the passenger sleighs of the C. N. O. to the Gow Ganda mine, where they will make a visit to all the properties in this new mining camp with a view of reporting as to its bearing on the expansion policy of railroad interests in that country.

The party may be out ten days.

## BIG DIVIDENDS PAID BY FIFTEEN COMPANIES

Five Million Dollars Distributed to Shareholders—Some of the Camp Doings.

COBALT, Feb. 3.—(From the Man on the Spot).—The payment by 15 Cobalt mines of nearly five million dollars in dividends during the past 13 months; the increased tonnage and greatly increased silver production; the number of new plants in operation in various sections of the camp, are the most satisfying evidences of the camp's greatness and stability.

## NEW BROKERAGE FIRM OFFICES AT ROYAL BANK

Bartlett Bros. of Gowganda Have Opened Brokers' Office in Toronto.

A new firm of brokers will begin trading in Toronto to-day, composed of F. R. and G. W. Bartlett, under the title of F. R. Bartlett & Co., Limited. The name is familiar owing to its connection with the well-known Bartlett Mines.

The firm proposes to carry on a regular brokers' business, their specialty at present being the stock of the Bartlett Mines, Limited, which is one of the best known mines in the Gowganda district.

Both the members of the firm are Toronto men. F. R. has been in the north end branch of the Dominion Bank at Winnipeg for the past eleven years, and G. W. is a partner in the firm of F. R. Bartlett & Co., Limited, which is a mineralogist.

The firm have well appointed offices in the Royal Bank Buildings, 12 East King-street, and will have connection in London, England, and also in New York. Both of the partners are specialists in their own departments and will prove an acquisition to local brokerage circles.

## GAS OVERCOMES FIREMEN

Dozen of Them Laid Out at Blaze at Albany Capital.

ALBANY, N. Y., Feb. 3.—New York's \$25,000,000 capital was slightly damaged and a dozen firemen were overcome with gas as a result of a fire which broke out late to-day in a storeroom in the basement of the building. Although the gas in the building was quickly shut off, the heat melted a four-inch gas pipe and the firemen entering the basement to fight the fire were overcome. All are expected to recover.

## Canadian Wheat Grading.

LONDON, Feb. 3.—A. E. Humphreys, expert miller, addressing the Royal Society of Arts, Earl Curzon president, declared his belief that there was no danger of a shortage in the world's wheat supply. He paid high tribute to Canadian grading and expressed wholehearted admiration of the way in which the difficulties of the situation in Canada were being tackled. Respecting the wheat, he said several judges had expressed their opinion that it was his reasoned opinion that the consumer would pay the duty on the imperial wheat. The producer would get a full 2s per quarter over the foreigner, but it did not follow he would be better off than the foreigner might suffer.

## Numerous Places Want Industry.

KINGSTON, Feb. 3.—The Wormwith Company has received liberal offers to locate its piano factory, from Stratford, Lockport, Prescott, Gananoque, Niagara Falls, Iroquois, Deseronto, Peterborough, North Bay, Chatham, Arnprior, Welland, Alexandria, Port Hope and Guelph.

To-morrow Kingston ratepayers will vote to grant the company a bonus of \$10,000.

*We beg to announce the opening of our offices in the Royal Bank Building Toronto dealing in stocks and bonds and all high class securities.*

*We are making a specialty of the stock of the Bartlett Mines Ltd and have published an illustrated booklets describing their properties at Gow Ganda which will be sent free on application.*

*J. R. Bartlett.*

## CONFUSION OF NAMES CREATES DIFFICULTIES

Elk Lake or Smyth, Which?—New Postoffice Being Asked for at Wigwam Lake.

ELK LAKE, Feb. 3.—(From our own man up there).—Application is being made for the establishment of a post office at Wigwam, the halfway house between here and Gowganda. Emile Jadoulin is the applicant, and a petition is being signed here and at Gowganda with that object in view. Mr. Jadoulin already has a general store at Wigwam, which place is most suitable for a post office serving the Miller Lake mining district.

Names Confusing.

There is apparently much confusion on the part of the postal authorities, owing to the name of the post office at Smyth being different from that of the town.

The post office, which is controlled by the federal government, is known as "Elk Lake," while the townsite, surveyed and named by the provincial government, is known as "Smyth."

As a consequence, officially the post office knows no such place as Smyth, and many letters have been returned to the sender for better address, as is shown by the markings on the envelopes which they will receive.

This is a matter that cannot be remedied too quickly. Those in authority should get together and decide on one name.

Movement Into Gowganda.

There is no change in the situation here as regards the number of men going into the Gowganda District, and other territory surrounding Elk Lake. The four hotels here are crowded each night with men going thru, and from what can be learned in conversation it is only an indication of what the rush will be in the spring, as soon as navigation on the Montreal River from Latchford opens.

Many Buildings Erected.

New buildings are being started every day and there is considerable enterprise for business sites for various purposes. Chinese are particularly in evidence, some desiring to open restaurants and others laundries, for which there is great need.

ENGINEER'S WATCH HOUR OUT.

COLLISION TAKES THREE LIVES.

SPARTANBURG, S.C., Feb. 3.—Three men were killed and several injured in a collision between two freight trains on the seaboard at line railroad near Greenwood to-day. The collision is alleged to have been caused by the engineer on the extra setting his watch one hour wrong. The engineer who jumped and saved their lives.

Another "Quake" at Montreal.

MONTREAL, Feb. 3.—An earthquake similar to the one of Sunday night which most people put down to an earthquake, but which were not registered by seismographs occurred at 4 o'clock this morning.

There is again no record at McGill or Ottawa, and the professors at McGill are at a loss to explain the phenomenon.

**NEW SCHOOL ROOMS**

Monthly Salary Bill—Paid at the Bank.

The high and public school teachers received their monthly cheques yesterday at the banks in their section instead of having to flock down to the school offices in the city hall. The total roll for the month, including the board officials, was \$27,000.

The three new rooms at Leslie-street school were opened yesterday. The rooms afforded accommodation for the two classes which have been brought in, Pape-avenue school sheds and Leslie-street basement.

Supt. Bishop states that he put A. Wadlow's name in for a caretaker's position before his relative, Trustee Smith, was elected.
