NEW STEAMER POUNDED TO PIECES ON ROCKS

ST. JOHN, N. B., May 20.—The crew of the steamer Morenawich went on a reef off Cape Race, Saturday, abandoned the vessel at sundown last night, her bottom having been beaten out by pounding on the rocks. The Morenawich is a total wreck and will break to pieces probably in the first storm. She was a new vessel bound from Liverpool for Toronto with a cargo of pig iron and stranded during a heavy fog.

READS LIKE A CHAPTER OF "SOLDIERS OF FORTUNE."

(Continued from page One.)

Cartagena, in Colombia, is the most interesting town Mr. Warren had ever seen. The old Spanish houses, built two hundred to five hundred years ago, still stand. At Sanaballo he saw five hundred soldiers board a small steamer to go up the coast to fight Indians or rebels. They wore no uniforms but were a nondescript crowd, everyone with a gun and a sword. The steamer captain was a huge Englishman, who explained that his duty ended when he anchored two miles off shore and landed the soldiers in boats. There was neither doctor nor medical stores on board for the captain only observed that none would be needed; those fellows would go through the enemy or the enemy would go through them, and the surgeon would find nothing to do.

At a Colombian port some young American adventures, among them one who had been a war correspondent in the Russo-Japanese war, sought to land, but were prevented, although their papers were all right. But they got ashore later on. They were in search of adventure, and would doubtless find it—a la Richard Harding Davis.

Mr. Warren says that gold and diamond seekers are plentiful in British Guiana. He conversed with a South African miner and a retired British officer, and several others, who were going into the interior to seek treasure or take up concessions. This remark recalled to Mr. Stewart's memory a meeting in Halifax before the board of trade delegates went to the West Indies and Demerara. He said that Dr. Macdonald was there, and that the business men had stated their views this mere scholar and theologian got up and for half an hour electrified the group as he pictured the resources of the interior of British Guiana, the great development that must take place, and the importance of Canada getting into the game.

Speaking of the West Indies, Mr. Warren said that many negroes go to the canal zone and so produce a scarcity of labor on the plantations, but as many of them come back with money the effect is really beneficial to the islands.

Among other things experienced in Central America, Mr. Warren found places where an American five dollar gold piece was worth ten local dollars, and another where the difference was many times greater. Speaking of the West Indies, he says life there is a lot-seating life, but there is something about it that calls one back to the tropics, a kind of intoxication that leaves a haunting memory. One can never forget the aromatic odors wafted on the land breeze before sunrise to the decks of the steamer nearing port, and the almost oppressive perfume of the flowers and trees.

Mr. Warren is looking extremely well, despite his fever experience in Demerara. He went through to Halifax today.

WEDDINGS :**Fielden-Redden**

This morning at 8 o'clock a quiet and pretty wedding took place at the home of Mrs. H. H. Roach, 69 Main street, when Miss Sarah E. Redden, sister of Mrs. Roach, was united in marriage to Captain Mayhew L. Fielden, of Hantsport, N. B. Rev. D. Hutchinson, of Main street Baptist church, performed the ceremony in the presence of a few intimate friends of the bride and groom. The newly wedded couple left on the 7 o'clock train for a trip which will take in Boston, New York and places of interest on the Hudson. After the honeymoon Mr. and Mrs. Fielden will settle at Irvington on the Hudson for the summer.

Mrs. Fielden has many friends in St. John who will long remember her as the very efficient matron of the Guild of King's Daughters.

DELAYED FREIGHT

Editor Times: Sir,—Messrs. A. L. Goodwin, Estabrook & Son and ourselves, had a lot of perishable goods shipped from Liverpool on the S.S. Dominion, of the Dominion line, on a through bill of lading to St. John, via Quebec, which left Liverpool April 24th. She arrived in Quebec on May 8th. Since that nothing has been heard of the goods—all efforts to locate them have failed. In the interests of the people who own the I. C. R., I want to ask if it has gone out of business or whether it is managed by a system of blundering incompetency. If the I. C. R. is the people's road, the owners should waste no time in ascertaining what this scandalous mismanagement means.

Faithfully yours,

THOS. POTTS.

THE TIMES WAS RIGHT

A morning paper prints a partial contradiction of the story in Saturday's Times relative to employees of Emerson & Fisher who were charged with selling the firm's goods and making no return. The Times stated that five persons were implicated. The Sun says there was only one. The Times information was correct. Five persons were implicated.

GREAT ENGINEER DEAD

NEW YORK, May 20.—A despatch from London today announces the death of Sir Benjamin Baker, one of the world's great engineers. It was he who invented the pneumatic shield which has rendered so much assistance in tunnelling under rivers. The two engineering works by which he will be best remembered are the Forth Bridge in Scotland and the Aswan dam on the Nile.

Who has no misfortune is fortunate enough.—German.
